Data Dock

Adults

Using data to help us improve practice and services

those with disabilities

Enabling Workstream - Dashboards, data, intelligence available to practitioners to support self led teams and continuous improveme

alternative services to improve independence in place of Day S

Key achievements so far...

More people staying in their own home:

Reduction in the percentage of eople referred to ASC who enter Long Term Residential Care, despite rising numbers of referrals

The impact for the people of Derbyshire:

erm Residential Placements each year

More people have greater independence at home:

Fewer people are seeing an increase in their homecare hours at review. However, where increases are being used, they tend to be larger in size.

The impact for the people of Derbyshire:

Using a strength based approach within our reviews we will connect people back to their local communities enabling independence and reducing the need for homecare support

More people have the opportunity maximise their independence

Increasing the number of people where the opportunity to utilise our and maximise their independence to receiving a long term service

The impact for the people of Derbyshire:

3, 588 people will be able to acceour STS (1320 more people)

What we've achieved so far...

The impact so far or peogle with a learning disability and /or who are autistic:

27 people have moved to a more independent setting so far

The impact so far for people with a learning disability and / or who are autistic:

318 people have an outcome focused support plan

Embedding a progression mod within our Supported Living Settings

People with a learning disability or who are autistic will have the opportunity to maximise the independence:

Rolled out new tool for practitioner grid

Reviews now being completed w people in supported living using tapproach

Day Opportunities Team

used to access one of our day centres 4 days a week with community transport. Following engagements with the Better Lives programm view t was suggested that A could access a specific gardening progression model where clear learning and skills steps were introduced er 12 weeks. This resulted in a growth in confidence and skills and now A is accessing a free allotment project in the community, alongs riend they met. The allotment has large polytunnel so it is accessible through the winter too.

Community Connectors

attended one of our day services for 9 years and was referred to Community Connectors via The Hub who connected them with a mmunity volunteer group. They are currently working alongside others in large formal gardens that are open to the public. They are par a team of formal volunteers and developing friendships and support networks in the community as well as maintaining the grounds and rdening whilst interacting with people visiting.

Day Centre

has set smart goals at the day centre with the overall outcome of moving to independent living. Using the new PSP and creating a skills velopment portfolio with C has enabled their learning needs to be broken down to smaller goals such as maintaining a home/nutrition c. C has worked at a range of skills such as cleaning the kitchen and preparing meals – photos were taken with consent and added to the e. C is proud of their achievements and can see the progress visually in their portfolio as well as next steps. This is so valuable for family d professionals when planning support needed to live independently.

Better Lives Residential Review Team

was admitted into residential care at a young age , moved to Supported Living last week. Has been accessing the community dependently to meet friends and enrolled in college for September. Ordered all their own items for their flat including choosing paint an poring.
