BETTER LIVES- PHASE 1A

WORKSTREAMS

	Workstream Aim	Workstream Metrics
 <p>Short Term Services</p>	Extra support to help people live happy lives at home	<ul style="list-style-type: none"> ↑ # number of people accessing the service each year ↓ reliance on long term domiciliary support after the STS intervention
 <p>P&P Assessments & Reviews</p>	Support planning for independent lives	<ul style="list-style-type: none"> ↓ # new admissions into residential care settings ↓ reliance on long term domiciliary support
 <p>Hospital Discharge</p>	Discharge support to get people home from hospital	<ul style="list-style-type: none"> ↓ # bed-based discharge decisions
 <p>Working-Age Adults</p>	Maximising independence for those with disabilities	<ul style="list-style-type: none"> ↑ # accommodation moves from Residential to Supported Living ↑ # alternative services to improve independence in place of Day Services
 <p>Data Dock</p>	Using data to help us improve practice and services	<p><i>Enabling Workstream - Dashboards, data, intelligence available to practitioners to support self led teams and continuous improvement</i></p>

Key achievements so far...

Long Term Residential Placements

More people staying in their own home:

Reduction in the percentage of people referred to ASC who enter Long Term Residential Care, despite rising numbers of referrals

The impact for the people of Derbyshire:
Fewer people will move to Long Term Residential Placements each year

Average Change of Homecare package at Review

More people have greater independence at home:

Fewer people are seeing an increase in their homecare hours at review. However, where increases are being used, they tend to be larger in size.

The impact for the people of Derbyshire:
Using a strength based approach within our reviews we will connect people back to their local communities enabling independence and reducing the need for homecare support

Referrals to the Short Term Service

More people have the opportunity to maximise their independence

Increasing the number of people who have the opportunity to utilise our services and maximise their independence by receiving a long term service

The impact for the people of Derbyshire:
3,588 people will be able to access our STS (1320 more people)

What we've achieved so far...

Move to a more Independent setting

The impact so far for people with a learning disability and /or who are autistic :

27 people have moved to a more independent setting so far

Day Opportunities

The impact so far for people with a learning disability and / or who are autistic:

318 people have an outcome focused support plan

Embedding a progression model within our Supported Living Settings

People with a learning disability or who are autistic will have the opportunity to maximise their independence:

Rolled out new tool for practitioners grid
Reviews now being completed with people in supported living using the approach

Success Stories

Day Opportunities Team

used to access one of our day centres 4 days a week with community transport. Following engagements with the Better Lives programme, a review it was suggested that A could access a specific gardening progression model where clear learning and skills steps were introduced over 12 weeks. This resulted in a growth in confidence and skills and now A is accessing a free allotment project in the community, alongside a friend they met. The allotment has large polytunnel so it is accessible through the winter too.

Community Connectors

attended one of our day services for 9 years and was referred to Community Connectors via The Hub who connected them with a community volunteer group. They are currently working alongside others in large formal gardens that are open to the public. They are part of a team of formal volunteers and developing friendships and support networks in the community as well as maintaining the grounds and gardening whilst interacting with people visiting.

Day Centre

has set smart goals at the day centre with the overall outcome of moving to independent living. Using the new PSP and creating a skills development portfolio with C has enabled their learning needs to be broken down to smaller goals such as maintaining a home/nutrition etc. C has worked at a range of skills such as cleaning the kitchen and preparing meals – photos were taken with consent and added to the portfolio. C is proud of their achievements and can see the progress visually in their portfolio as well as next steps. This is so valuable for family and professionals when planning support needed to live independently.

Better Lives Residential Review Team

was admitted into residential care at a young age, moved to Supported Living last week. Has been accessing the community independently to meet friends and enrolled in college for September. Ordered all their own items for their flat including choosing paint and flooring.
