## Appendix 3

## **Risk Management Assessment**

Risk	Proposed mitigation
If a decision was taken to revert to using the HSF to provide grocery vouchers to families with children eligible for benefit related FSM to cover all school holidays, this may create dependency and ongoing expectation that DCC will do this in all holidays. The new pensioner element means that funds are not available to do this for all holidays in the period (May half term and the summer and winter holidays).	This group of vulnerable families received a £50 food voucher in June 2022. Families eligible for FSM will also be able to access other elements of the fund via Childrens Professional grants, district and borough councils and DDF at other times during grant period, including school holidays. This will include promotion of other schemes such as the HAF programme which is targeted at families eligible for benefit related FSM during the Summer holidays 2022/3. Children's Professionals will be encouraged to consider families' needs over the summer in terms of the timing of submitting grant applications.
Not providing grocery vouchers to children eligible for benefit related FSM over holiday periods may risk reputational damage to the Council if other neighbouring local authorities use HSF to continue to fund these. In addition, there is a risk of reputational damage from offering a £50 voucher per eligible child because vouchers offered as part of the first HSF in February were £80 per eligible child.	delivering the vouchers that is supporting identification and targeting families. Strategically targeting funding over the grant period, this group of vulnerable families will receive a £50 food voucher in June 2022. Eligible families will also be able to access other elements of the fund via Childrens Professionals Grants, DDF, and district and borough councils at other times during grant period. The HAF scheme will also be available in the summer holidays. These alternative routes will be promoted to parents who receive the vouchers via communications via schools and on the council website. It will be made clear on the website that the grant terms stipulate 33% of the fund must be distributed to pensioners and that this is a new stipulation the Council has had to deliver – to explain why less funding is specifically directed at families with

children.

Not collecting the correct management information data to enable the Council to retrospectively claim the funds from DWP, given that the grant is paid in arrears.	Officers will ensure careful monitoring of funds the Council distributes. Funding agreements / Service Level Agreements will be put in place with third parties – districts and boroughs and CVS organisations. These measures worked efficiently with the first HSF.
Being unable to distribute all available funds to residents (£5.4m) in the timescale allowed	Officers are working with partners and corporately across the council to create a range of accessible routes for residents to access the funds. Additional staff are also being recruited via agency and/or redeployment to increase capacity of existing services including DDF, Call Derbyshire and Early Help and Safeguarding Teams, to help ensure funds can be distributed within the timescale. A significant amount of the funds will be utilised for targeted direct awards for key vulnerable groups Council officers will regularly review the grant spend with partners and finance. Previous HSFs have spent funding in time allotted
Take up for both grocery vouchers and energy grants exceed their expected take up of 90% and 75% respectively and risk an overspend.	<ul> <li>93% take up/redemption of grocery vouchers was achieved in February 2022 after significant work was undertaken to contact parents who had not redeemed their voucher (after a month) to encourage them to take it up. With previous schemes, where such a push had not been undertaken, a redemption rate of 85% had been achieved.</li> <li>To mitigate the risk of overspend, the rate of uptake would be carefully monitored, and the scale of work undertaken to contact parents who had not cashed the voucher adjusted accordingly.</li> <li>It is hard to estimate how many pensioners/ASCH clients will be mitigated by the fact some residents will be eligible via both eligibility criteria but would only receive one £100 grant payment. The overall budget will be monitored and other</li> </ul>

elements, such as grants via Childrens Professionals or Age UK/DCA, could be ceased before the end of the grant period if needed.Communications about the availability of the fund do not reach some residents facing financial hardship.Work will be carried out with professionals and organisations who work with hard-to-reach groups to promote the fund (BME Forum, financial inclusion groups etc). Information will be made available in different formats and on multiple channels. The Equality Impact will be updated to identify and respond to any other groups that may potentially be excluded. Funds provided to 3rd sector organisations will expand schemes already working to identify hard to reach pensioners and unpaid carers.Council services could be overwhelmed by demand for support from residents facing financial hardship, especially given the short life span of the grant.Demand under the first round of HSF funding did cause significant challenges for service delivery, in particular for Call Derbyshire and the DDF assessment team. Officers have engaged with a wide range of partners to increase the number of access points to the fund, make best use of existing capacity and optimise existing referral routes across the system. Initial work is underway to build an online application for residents to remove pressure from Call Derbyshire, although this in itself may lead the or increase in exprise damand

Derbyshire, although this in itself may
lead to an increase in service demand.
Communication about availability of
the grant will be planned dependent
on demand and capacity levels.
Demand may continue beyond the Demand for DDF support has
end of the funding provided by the governmentremained high after the end of the first allocation of HSF funding and before
government allocation of HSF funding and before the second was announced.
Communication from the Council to
residents and partners will be clear
about the scope of offer this additional
support because of temporary
government funding that ends in
2023.
Officers leading DDF work will plan for
the impact of high demand and share

this with senior leaders in time for appropriate decisions to be made. Step down options and funding are being created and shared with SMT. A pressure bid was developed in September 22; however this has been rejected so alternative funding and models
in development.
