

## Local Objective 4

To enable and support Derbyshire communities & residents to recognise, understand and manage their own flood risk.

|   | Key actions  | Ref No | Breakdown of action to achieve the overarching objective   | Priority | Timescales | Status |
|---|--|--------|--|----------|------------|--------|
| 1 | Annually review how flood risk management is communicated to the residents of Derbyshire | 4.1.1  | Raise the awareness of our strategy and associated responsibilities and procedures through the use of the County Council's website, public meetings, social media, one-to-ones etc                 | H        | L          | C      |
|   |  | 4.1.2  | Raise awareness of our prioritised approach to the risks of flooding in order to manage the customers' expectations.   | M        | L          | C      |
|   |  | 4.1.3  | Work with the Environment Agency and other Risk Management Authorities supporting their community work and engagement  | M        | L          | C      |
| 2 | Promote personal and community resilience to flooding, before during and after an event. | 4.2.1  | Engage with communities/individuals/businesses that have an awareness of critical drainage assets in the area and promote localised priorities and enhanced maintenance where feasible/appropriate | H        | L          | D      |
|   |  | 4.2.2  | Support Parish/Town Councils and or local community groups where appropriate in identifying and managing local sources of flooding   | H        | L          | C      |
|   |  | 4.2.3  | Provide guidance for residents and businesses on how to become more resilient working closely with Parish/Town Councils and/or local flood action groups at a local level.                         | M        | L          | C      |
| 3 | Encourage and promote best practice for land and asset management                        | 4.3.1  | Enhance awareness amongst communities of local drainage infrastructure and the roles of the responsible persons for its management   | H        | L          | C      |
| 4 | Promote Flood warden schemes to assist communities in managing their own risk            | 4.4.1  | Promote the schemes to communities affected by flooding and those at an increased risk due to climate change.  | M        | L          | C      |
|   |  | 4.4.2  | Assist Emergency Planning and the Environment Agency in the delivery of flood warden training events and workshops.  | H        | S          | C      |
|   |  | 4.4.3  | Implement flood warden schemes using a prioritisation approach, encouraging take up of the schemes and guiding communities through the scheme process  | H        | S          | C      |
