

Local Objective 5

Work to restore, protect and enhance the historic and natural environments of Derbyshire

Key actions	Ref No	Breakdown of action to achieve the overarching objective	Priority	Timescales	Status
Promote sustainable and multi-benefit flood risk management activities	4.1.1	Promote early engagement so opportunities for multi-benefits can be maximised, working closely with catchment partnership arrangements and other relevant groups	M	L	C
	4.1.2	See 2.2.4	M	L	C
	4.1.3	Work with the County Council's internal teams to ensure that any works undertaken or consented take due regard for protected habitats, species and the historic environment	M	L	C
	4.1.4	Work with partner organisations to promote land management initiatives	M	L	C
	4.1.5	See 2.3.2	M	S	C
2 Support the Environment Agency in implementing the objectives of the Water Environment Regulations (Water Framework Directive) 2017.	4.2.1	Liaise with internal teams at the County Council, explaining the County Council's duty to support the Environment Agency with achieving The Water Environment Regulations objectives and working collaboratively to establish good working practice	M	L	E
	4.2.2	Advise and provide guidance to the public regarding pollution causes and the importance of the The Water Environment Regulations	L	L	C
	4.2.3	Seize opportunities to improve the The Water Environment Regulation status of the water environment in Derbyshire alongside any flood risk management activities, working with and supporting community based delivery groups	L	L	C
3 Support local environmental groups where there are potential benefits for local flood risk management	4.3.1	Support Biodiversity Action Plan targets and relevant groups/organisations through local flood risk management functions where possible	L	L	E

Note:- An explanation of the Priorities, Timescales and Status's can be found in the Strategy Part 2 document - Page 14
