Introduction

Three in five people will be carers at some point in their lives and almost everyone will know family members, friends and colleagues who are carers. There is not a 'typical carer' and everyone's caring role is unique. Carers come from a range of backgrounds, situations and age groups. Some carers move in and out of the role many times and provide various types of care, often to more than one person.

Caring can be very rewarding and carers provide invaluable assistance to those depending on it. It is estimated that carers in Derbyshire contribute over £998 million to the local economy and collectively represent the largest provider of care and support. The important role that carers play is vital to sustaining our health and social care system and it is essential that we continue to ensure carers are supported and genuinely valued as partners and experts in their role.

The role carers play is one to be celebrated, but providing care often comes at great personal cost to those sacrificing their own time, energy and money to carry this out. For many, caring can have a detrimental impact on physical and mental wellbeing, with many giving up a lifestyle and opportunities that non-carers take for granted. It is therefore essential that we all recognise the impact of caring in order to support carers effectively and assist them to maintain their role whilst having a life alongside caring.

Purpose and Scope of our strategy

Much has been achieved from our last Carers Strategy (2016-2019). However, further changes in government policy mean that a new strategy is necessary to reflect these changes and ensure our vision for supporting carers is fit for the future.

This strategy has been developed by Derbyshire County Council and Derby and Derbyshire Clinical Commissioning Group as a joint approach to strengthening early intervention and integrated support. It seeks to respond to the issues that have been highlighted locally and outline how everyone across the system can specifically work together to improve the lives of all carers.

Our refreshed priorities will inform the design of future support and developments and set out what we will concentrate our joint resources on to ensure carer health and wellbeing over the five years from 2020 - 2025.

This strategy is for all unpaid carers supporting someone who lives in Derbyshire, regardless of the condition of the person depending on them. It includes adult carers, working carers, parent/family carers, young adult carers and young carers under 18 and recognises that all carers have a diverse and unique range of needs, priorities and interests.

A range of carers have been instrumental in the design and development of many other strategies and service offers across Derbyshire which recognise the importance of supporting carers.

Who is a carer?

A “carer” is an adult who provides or intends to provide care for another adult (an “adult needing care”)

A “young carer” is a person under 18 who provides or intends to provide care for another person.

Carers in
Derbyshire

Carers may not recognise themselves as carers and may prefer to continue to identify primarily as a husband, wife, partner, sibling, parent, child or friend rather than a carer. It is important for carers to consider themselves carers' so their role can be recognised and their contributions acknowledged.

A “parent carer” means a person aged 18 or over who provides or intends to provide care for a disabled child for whom the person has parental responsibility.

Carer demographics in Derbyshire

These figures are not static - whilst some carers are taking on caring responsibilities, for others the role ends. It is this turnover that means **3 in 5 of us will become a carer** at some point in our lifetime. (Carers UK)

Young Carers

There are an estimated **1643** young carers aged 18 and under in Derbyshire. The average age of young carers in the UK is 12. (2011 census)

The 2011 census highlights that women are more likely to be carers than men, with **57%** of women and **43%** of men providing care in Derbyshire. The impact will fall disproportionately on women as the demand for informal care increases.

57%

43%

Carers living in Derbyshire

According to the 2011 census, Derbyshire has a population of **93,000** carers. ONS Population Projections predict that by 2041 the county's population will have increased by **7.9%**, which could lead to a population of at least **100,347** carers.

60% of carers in Derbyshire are aged 50 or older.

Working Carers

An estimated **52,165** people combine the provision of care alongside **paid work** in Derbyshire (Derbyshire Observatory)

BAME Carers

There are 32,652 people from Black Asian Minority Ethnic (BAME) groups living in Derbyshire. Across England & Wales there are 719,684 BAME carers, which is **12.5%** of the national number of carers. (2011 census)

How this strategy was informed

We recognise the importance of talking to carers about what matters to them. This strategy reflects what a range of unpaid, family carers and those who depend on carers, have told us to refresh our understanding of what carers want.

This strategy has also been informed by many partner organisations in the local health, social care and voluntary sector who frequently support carers. These include Creative Carers, Healthwatch Derbyshire, Derbyshire Carers Association, Links CVS and the National Development Team for Inclusion. The Council took part in the biennial NHS Digital Satisfaction Survey for Adult Carers in 2018/19 and completed a national self-assessment on the progress of supporting carers in Derbyshire which included an on-line survey and a key engagement event.

Supporting carers remains a priority for Derbyshire's health and social care system. The priorities and actions within this strategy complement and link with the priorities of the Health and Wellbeing Board and the Joined up Care Derbyshire plan to help us adopt a comprehensive, whole system approach to identifying and supporting carers.

We have also taken learning from national sources so the priorities set out in this strategy support the delivery of the Department of Health and Social Care Carers Action Plan (2018) and the objectives for carers outlined in the NHS Long Term Plan (2019), which have been strongly endorsed in our discussions with carers locally. For further information about what carers have told us visit:

www.carersinderbyshire.org.uk/what-carers-tell-us

Twitter

Twitter posts included throughout this strategy are a sample of the 'live tweets' posted during the Derbyshire Carers Engagement Event to capture the views and opinions of the carers (67%) and professionals who attended. The event was held on 28 November 2019 in South Normanton and was led by [Sortified CIC](#)

What do carers say about their experience of caring?

“I need help and I want things to change. I feel stuck” (Young Carer)

“I would like to see more help for individual carers and more understanding of the stress we go through on a daily basis”

“I choose a part time relief job to try and fit in with my caring role but was often unable to pick up the shifts due to the priority of caring”

“We need a safety valve – we’ve faced so many fights just to get our daughter a basic service”

“Working and my carer role means I don’t go out and no longer see friends except if they visit...”

“I’d like to have a break. To go out to things, and to have things I can go and do” (Young Carer)

“What happens when you don’t know your way around social care? Or if you do, you don’t know what to say”

“I am always on alert and feel exhausted, there is no recognition of how caring impacts our health through constant worry about loved ones”

Findings of the 2018/19 satisfaction survey of adult carers

Funding support for carers who provide care to an adult comes from central Government through to the Council and Clinical Commissioning Group to form a joint carers budget that is currently managed by Derbyshire County Council.

Achievements from the last strategy 2016-2019

- Implementing the duties of the Care Act 2014 and Children and Families Act 2014 for carers
- A rise in the number of carers identified and referred for support by partner organisations across Derbyshire
- An increase in the number of those receiving assessment and carer support
- A county-wide carers support service providing carers with access to information and advice in one place, offering a greater range of support options
- Reliable and up to date on-line information available on the Carers in Derbyshire platforms; website, Facebook, Twitter and YouTube channel
- Growth in the number of carers creating an emergency plan
- Improved transition for young adult carers to the adult carers service
- New systems and processes that assist in joining up support and decision making between the Carers Service and Adult Social Care and Health
- Provision of Independent Advocacy for carers

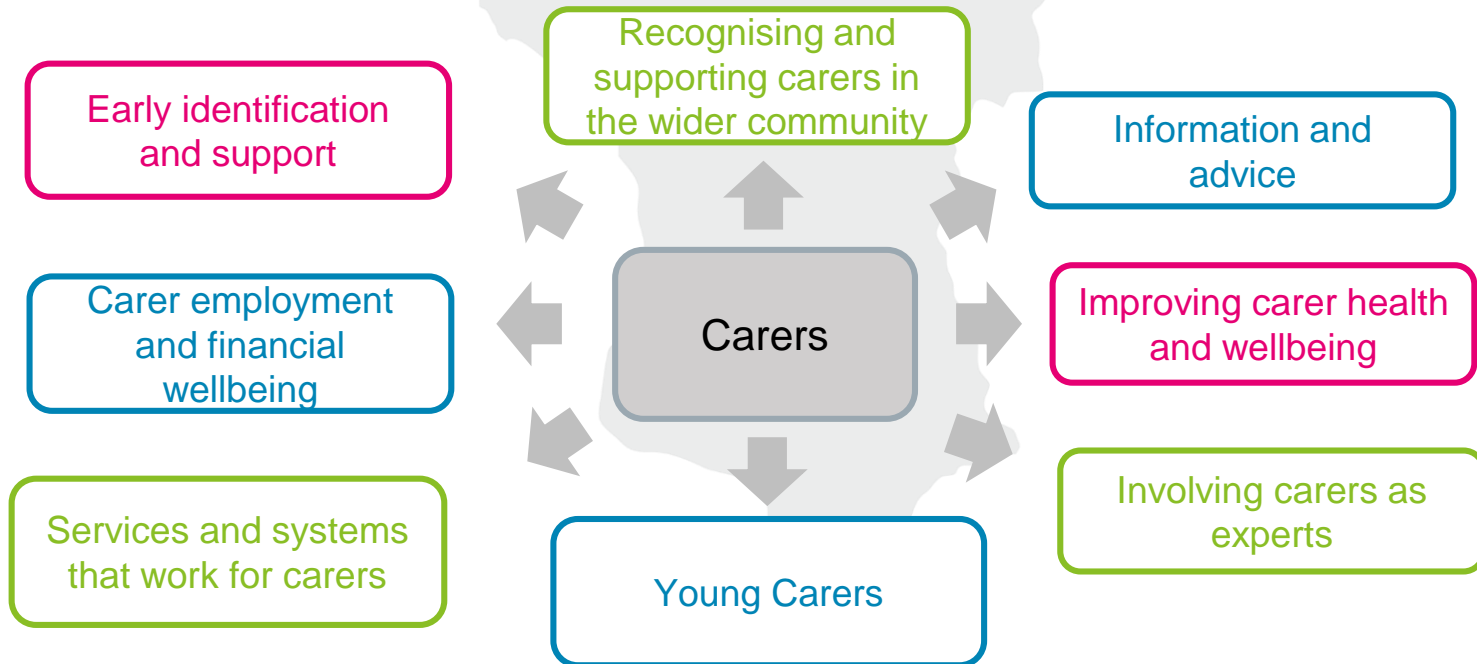

Challenges from delivering the last strategy over 2016-2019

- Ensuring carers receive recognition and respect in the care of their loved one
- Involving a range of carers at a strategic level to comment on the quality of services and shape what services look like in the future
- Identification of young carers
- Ensuring services work together to support the whole family
- Provision of a variety of breaks for carers
- Identification and support for carers through primary care
- Offering carer assessment in a way that works for all carers
- Ensuring carer registers are maintained in primary care
- Reducing waiting times for carer assessment
- Exploring how technology can be used more to help carers carry out their role
- Making communities carer friendly

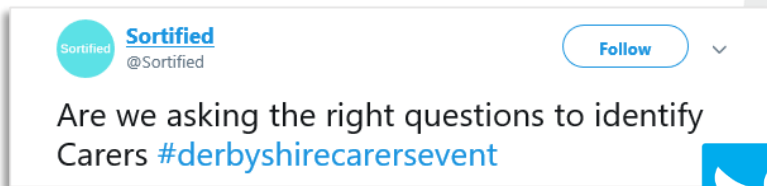

Our refreshed priorities for 2020 - 2025

- We have developed 8 strategic priorities based on the issues that mean the most to carers and those that will make the biggest difference to the lives of local carers.
- These priorities will shape developments and inform what we concentrate our joint resources on.
- Our overall direction is in line with the objectives set out in the National Carers Action Plan, the NHS Long Term Plan and other national policies which outline the basis for effective and efficient carer support.
- We will continue to take into account what carers tell us is important to them to continue their caring role when redesigning or delivering carer services and support.

Carers said

- Recognise when we're a carer and help us to recognise this too, especially at the point of diagnosis.
- Identify who is caring in the family and what support is needed by everyone.
- Provide checks on our physical health and mental wellbeing through primary care.
- Many carers from Black, Asian and minority ethnic communities, mental health carers, parent carers and young carers feel overlooked as carers and that their needs as carers are not fully understood.

Priority – Early Identification and Support of Carers

To increase awareness and identification of carers of all ages:

- We will continue to work with partners across the local system to ensure more carers are proactively identified in the early stages of caring.
- We will promote the value of local services working together to support families as a whole.
- We will use the framework set out in the quality markers to develop and promote carer-friendly GP practices and endorse the benefits of supporting carers through primary care.
- We will continue to reach out to carers from under-represented and vulnerable groups to ensure they are identified and supported in a personalised way.

Carers said

- Give us new information about systems and processes, as soon as it becomes available, in ways that help us make informed choices and empowers us for the future.
- Provide alternatives to, or support for, carers less confident about using the internet, so we can still access the information and advice we need.
- Provide information that is not reliant on health and social care jargon or the term 'carer'.
- Understand that Black Asian and minority ethnic carers may not be familiar with the support offered by services or may not be able to access them.
- Provide us with someone to talk to who knows the relevant system/processes inside-out and can make this easier for us to ask the right questions.

Priority – Information and Advice

To ensure carers of all ages can find information and advice they need easily:

- We will work with carers to produce the right information and advice in new and accessible ways. We will continue to provide paper based information alongside the digital information platforms and encourage take-up of this on a wider scale.
- We will continue to invest in training and learning for carers to ensure they can carry out their role safely and with confidence.
- We will ensure carer assessment is timely, proportionate and personalised so carers feel it is of benefit.
- We will equip partners with the skills and knowledge to provide accurate information that supports carers.

Carers said

- Ensure we get what we need quickly and simply without going through complicated systems and processes.
- Clearly tell us what to do, and where to go, when we're faced with an emergency impacting on our caring role.
- Make it easier for us to obtain statutory support and financial benefits rather than having to battle for everything.
- Stop making us repeat the same information over and over.

Priority – Services and Systems that work for Carers

To ensure services and systems work for carers of all ages:

- We will continue to raise awareness and promote best practice amongst health and social care professionals to identify, value and support carers effectively.
- We will work with all partners delivering front-line services to help them work alongside carers as part of a team.
- We will influence initiatives and partnerships in Derbyshire so that they explicitly include carers and better meet the needs of carers.
- We will continue to strengthen emergency planning and crisis support for carers in emergencies.
- We will evaluate our model of carer support and develop the specification for future carer services.

Carers said

- Tell us about the peer support available and make provision for us to bring our loved ones, if necessary.
- Provide us with simple and straightforward information about help available for us if we're struggling with our caring role; including ways we can potentially avoid our health suffering as a result of caring.
- Provide us with options available to us when we need to have a break from the caring role.
- Recognise it's important that we ourselves identify what's missing in our lives and receive the right kinds of help and support to fill the gaps at our own pace, in our own time and in our own way.

Priority – Improving Carer Health and Wellbeing

In order to improve the health and wellbeing for carers of all ages:

- We will explore new ways to connect carers with other carers and promote the support of each other.
- We will continue to raise awareness of the impact of caring on carer mental health and the importance of emotional support.
- We will actively support carers to plan and prepare for the future.
- We will review the effectiveness of the way Carer Personal Budgets are delivered to meet carer's eligible needs in a personalised way.
- We will continue to develop new and effective ways of providing carers with a break from caring and/or keeping in touch with family and friends.

Denise's story:

Denise has Bipolar disorder, Osteoarthritis and is also a carer for her adult son Paul, who is experiencing depression and anxiety.

Denise provides considerable care and support to Paul, who requires reassurance and encouragement in every aspect of his life, including washing, dressing, eating a meal, taking his medication and managing his finances.

Denise is exhausted and feels she is neglecting her own health as a result of her caring role. Denise often feels overwhelmed with loneliness, guilt and frustration.

Denise contacted the carer's service for advice and support. Through discussion, Denise and a Carer Support Worker were able to explore ways in which Denise's quality of life and wellbeing could be improved and how the impact of caring could be reduced.

Outcomes:

Following support from the carers service, Denise went on to:

- Change her outlook and feel more positive following counselling support from Talking Mental Health Derbyshire
- Register as a carer with her GP, where she received a health check and personalised advice on healthier choices and options
- Obtain friendly advice, valuable information and a lifeline from other carers through attending a local support group
- Resume a hobby and feel more empowered to put herself first.
- Receive welfare benefits advice leading to an increase in her financial entitlement.

Young carers said

- Acknowledge our role when we are supporting a member of our family and offer support to everyone in the family.
- Talk to us, really listen and don't make assumptions about what we do or don't do.
- Keep us informed when support changes.
- Make services more joined up, especially when support moves from different services.
- We need support to think about the future.
- Schools need to know we are young carers.
- Support us to have a break and just be a 'young person'.

Priority – Young Carers

In order to improve the way we support young carers:

- We will continue to work with partners to increase awareness and identification of young carers and promote the benefits of supporting the whole family.
- We will promote the take up of 'top tips to support young carers' in primary care.
- We will continue to provide support that protects young carers and young adult carers from caring excessively.
- We will work with partners to improve educational, training and employment opportunities for young carers.
- We will provide peer support and break activities with young carers and young adult carers.

Tom's story

Tom is 12 and cares for his mum, Jenny who suffers with a back condition and epilepsy. They have recently moved house after fleeing domestic violence and no longer live close to other family members.

Tom does not attend school on a regular basis as he feels anxious and guilty about leaving his mum alone.

Tom has struggled to make friends at school and has experienced bullying. He is not involved in social activities and tends to feel more comfortable in adult company. Tom would like some support for his mum, to make friends and feel more confident.

Outcomes:

Following support from the Young Carers service, Tom went on to:

- Talk about his feelings and understand his family situation as a result of regular social time with a young carer's support worker

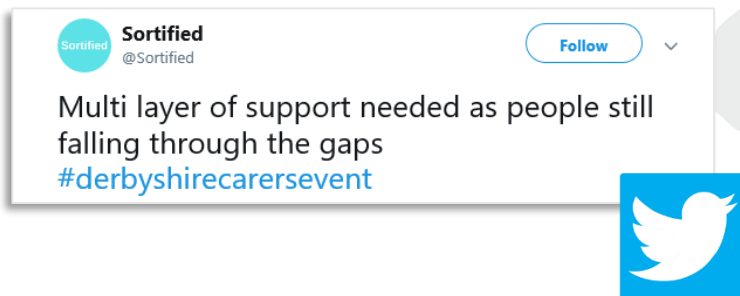

- Build up trusting new relationships following participation in organised activities for groups of young carers of a similar age
- Have a special arrangement in school that allowed him to contact his mum when he felt concerned
- Increase his attendance at school and feel more confident about leaving his mum
- Access swimming lessons that were nearby and affordable

Tom's mum Jenny went on to

- Access support from Adult Care and obtain adaptations in the home and the offer of a personal assistant to support her to get ready every morning
- Access a social group at the local church, which reduced her feelings of isolation and helped her make new friends. Jenny was also able to access counselling support through her GP
- Both felt the support service was really helpful and had led to positive changes and a new beginning

Carers said

- Understand we need to meet others with similar experiences within community spaces for understanding, empathy and tried-and-tested practical solutions.
- Speak to us (and be heard) on our own terms within our communities, in ways that are meaningful to us.
- Support us to come together with other carers in order to improve local decisions and ensure a carer's perspective is understood, and acted on, at every level of decision-making.
- Recognise our value, strengths and knowledge within local neighbourhoods.
- Recognise our strengths and skills and encourage and support us to do the same.

Priority – Recognising and Supporting Carers in the wider Community and Society

In order to recognise and support carers of all ages in local communities :

- We will continue to raise public awareness and recognition of carers and an understanding of caring across communities and wider society.
- We will continue to develop peer support which can also include the person depending on care within local communities.
- We will explore new ways for carers to be engaged in their local communities and connected to local community support.
- We will examine and promote technologies which effectively support carers in their role.
- We will support carers to access peer support through social media platforms.

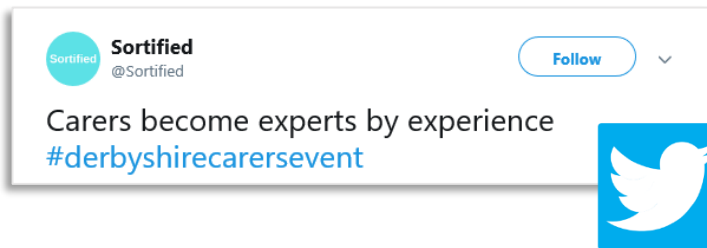

Carers said

- Acknowledge and value us as an 'equal expert partner' - one of a team among professionally paid and qualified people.
- Listen to us so that we can provide that team with accurate up-to-date information, in confidential spaces, if needed, and contribute to workable solutions.
- Ensure we agree to support plans where we'll almost certainly have a key part to play (rather than our role being assumed or taken for granted) before they are signed off.
- Keep us up-to-date about progress in changing, improving or starting services for our loved ones.

Priority - Involving Carers as Experts

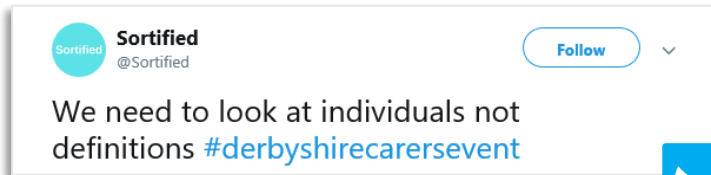

In order for carers of all ages to be respected and valued as equal partners:

- We will increase the involvement of carers in the care of the people they look after and ensure their role is recognised, valued and respected.
- We will ensure that a range of methods are used to capture the diversity of carer's views and fully involve carers in service changes or proposals.
- We will influence new initiatives and partnerships so that they effectively meet the needs of carers and support carers' rights.
- We will explore how we can resource carer-led participation in commissioning and decision-making.

Carers said

- The financial impact of caring is devastating when we have to give up a job to provide care.
- Staying in work can provide us with respite from caring and help to build our resilience.
- Provide us with better information about the costs of care and support and how to plan financially for the future.
- Information about financial help for the whole family is the most effective approach.

Priority – Carer Employment and Financial Wellbeing

In order to support carers of all ages and their families:

- We will ensure more carers are able to balance work and care with support to return to work alongside or after caring.
- We will support carers to minimise the financial impact of caring, through the promotion of good employment practice and awareness of benefits.
- We will work with employers to improve working practices and develop carer friendly employers.
- We will seek to raise awareness about the needs of carers among employers and support carers to stay in work or get back into work.
- We will link into the workforce strategy to support working carers more consistently.
- We will help carers obtain the benefits information and support they need.

Next Steps

- The Carers Strategy Delivery Group headed by Derbyshire County Council and Derby and Derbyshire Clinical Commissioning Group will lead on the delivery of this strategy. A detailed action plan and annual progress report will be produced to ensure accountability and visibility of the work and will be found on www.carersinderbyshire.org.uk/carers-strategy
- There are a number of actions and opportunities within this strategy which include partners and it will also be the task of the Carers Strategy Delivery Group to ensure everyone is on board and working towards our collective ambition to provide the best support possible for carers across Derbyshire.
- The views and experiences of carers remain paramount in informing the progression and evaluation of the strategy. All carers are invited to be part of this work through organised carer events, carer groups, surveys and other feedback mechanisms. For details of carer engagement events/opportunities visit www.carersinderbyshire.org.uk/having-your-say

Derbyshire Carers Charter

A carer is someone of any age who provides unpaid support to family or friends who could not manage without this help. This could be caring for a relative, partner or friend who is ill, frail, disabled or suffers with mental ill health or substance abuse.

We promise to:

Draft Delivery Plan

Implementation Action	Lead	2020 -21	2021 -22	2022 -23	2023 -24	2024 -25
PRIORITY 1. Early identification and support of carers						
1.A: Promote framework of NHSE quality markers for carer-friendly GP practices to increase identification of all carers	DCCG					
1.B: Embed carer awareness through system-wide education and training programmes to improve staff skills and understanding of the carer experience	All partners					
PRIORITY 2. Information and Advice						
2.A: Promote the Carers In Derbyshire website and information platforms to carers and professionals	All partners					
2.B: Detailed engagement with carers to inform the development of information and advice and carer learning that makes the most difference to the caring role	All partners					
PRIORITY 3. Services and Systems that work for Carers						
3.A: Work with employers, health, social care and education to ensure all support services join up to support carers and the family as a whole	All partners					
3.B: Evaluate our model of carer support through detailed engagement with carers and partners	DCC and CCG					
3.C: Work in partnership to improve the effectiveness of carer emergency planning and target carer support to prevent carer breakdown	All partners					
3.D: Promote system wide adoption of Carers Charter						

Draft Delivery Plan

Implementation Action	Lead	2020 -21	2021 -22	2022 -23	2023 -24	2024 -25
PRIORITY 4. Improving Carer Health and Wellbeing						
4.A: Consider new ways in which carers can connect with other carers, feel safe and supported and have time away from caring	DCC and CCG					
4.B: Raise awareness of the impact of caring on mental health and the requirement for emotional support for carers	DCC and CCG					
4.C: Review the effectiveness of the way Carer Personal Budgets are determined and delivered	DCC					
PRIORITY 5. Young Carers						
5.A: Increase number of schools who are proactively identifying and supporting young carers	DCC					
5.B: Promote the take up of NHSE 'top tips to support Young Carers' in primary care	CCG					
5.C: Ensure young adult carers have access to training and employment opportunities	DCC CCG & Partners					
PRIORITY 6. Recognising and Supporting Carers in the wider community and society						
6.A: Increase community awareness of who carers are and what they do to encourage a 'carer friendly' approach across wider society	DCC CCG & Partners					
6.B: Develop community incentives to self-identify as a carer	DCC CCG & Partners					
6.C: Develop technology that will support carers and allow services to be delivered differently through the utilisation of technology	DCC					

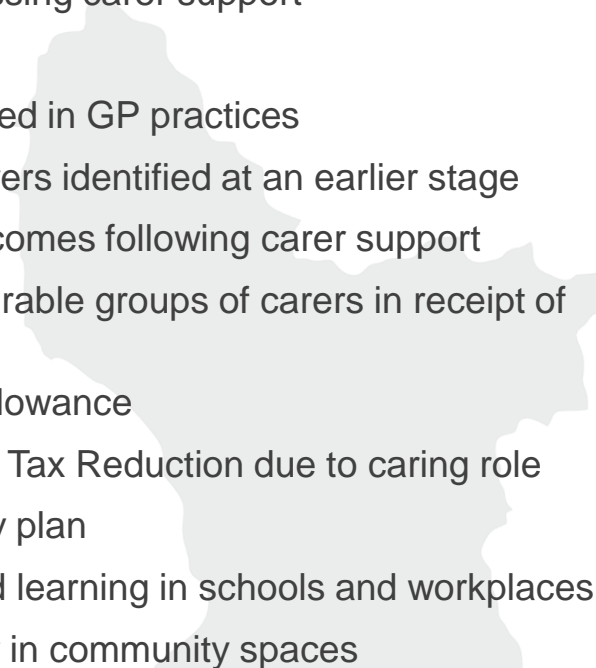

Draft Delivery Plan

Implementation Action	Lead	2020 -21	2021 -22	2022 -23	2023 -24	2024 -25
PRIORITY 7. Involving carers as experts						
7.A: Make sure we use a 'whole family approach' to ensure carers are listened to early on and respected as an expert in the care of the person they support	DCC CCG and Partners					
7.B: Explore new ways to involve a wide range of carers in service redesign and commissioning	DCC CCG					
7.C: Support carers to plan for the future and fully involve carers in service re-design and new initiatives	DCC CCG and Partners					
PRIORITY 8. Carer employment and financial wellbeing						
8.A: Raise awareness of the challenges carers face in the workplace and support employers to adopt carer friendly policies						
8.B: Build relationships and support co-ordination across education, employment groups and the Department of Work and Pensions, to highlight the support needs of working carers or carers returning to work						
8.C: Help carers obtain financial information and advice and reach the support they need to maximise entitlements and income						

DCC – Derbyshire County Council CCG - Derby and Derbyshire Clinical Commissioning Group
 Partners – Statutory, voluntary and independent organisations working together across Derbyshire to support carers
 Priority actions in progress are highlighted in darker blue

How will we know if we are making a difference and benefitting carers?

We will expect to evidence an increase in the number of:

- Carers referred for and accessing carer support
 - Referral sources
 - Carers identified and registered in GP practices
 - New carers identified and carers identified at an earlier stage
 - Carers reporting positive outcomes following carer support
 - Under-represented and vulnerable groups of carers in receipt of support
 - Carers in receipt of Carers Allowance
 - Carers in receipt of a Council Tax Reduction due to caring role
 - Carers making an emergency plan
 - Carer awareness training and learning in schools and workplaces
 - Carers supporting each other in community spaces
- 

We will monitor our progress using measures from the Survey of Adult Carers in England. This captures feedback on topics that are considered to be indicative of a balanced life alongside an unpaid caring role.:

- The proportion of carers who report overall satisfaction of carers from social services
- The proportion of carers who report they have been included or consulted in discussions about the person they care
- The proportion of carers who find it easy to find information and advice about services

Our vision is that by 2025 we want Derbyshire to be a place where:

- Carers will be proactively identified and supported at any point within the local health, social care and voluntary sector
- Carers will also be recognised and supported in local education, employment, leisure, faith, and community settings
- Carers will report full involvement in plans where they have a role, whether those plans are drawn up by health or social care
- Carers will find it easy to get the information, advice and support they need
- Carers and their families can expect services and systems to join up in a way that is helpful to them
- Carers will plan ahead and feel more confident in the event of a crisis or emergency
- Carers will be using technology to support them in their caring role
- Carers will enjoy better physical health and be able to access emotional support and further help should they need it
- There will be greater recognition for young carers
- Carers will live in communities where understanding of caring is growing and carers are recognised, valued and respected

We want to evidence that carers will tell us:

I feel recognised as a carer and was offered support in my own right

I can find the information I need, quickly and easily

I feel recognised and valued by my employer

I feel supported in my local community

I know how to look after myself to remain healthy and well

I feel respected, included and fully involved

I have contact with friends and family

I feel safe and in control

I have the opportunity to be involved in designing the services I use

I am using technology to support me as a carer
