Agenda Item No

DERBYSHIRE COUNTY COUNCIL

AUDIT COMMITTEE

23 March 2021

Report of the Director of Finance & ICT

ACCOUNTING POLICIES

1 Purpose of the Report

To provide Members with amendments to the Accounting Policies for 2020-21 and with the proposed Accounting Policies for 2021-22.

2 Information and Analysis

2020-21 Accounting Policies

On 27 May 2020 (meeting rescheduled from 24 March 2020 because of the Covid-19 pandemic), Audit Committee approved the proposed Accounting Policies for the 2020-21 financial year, including amendments for IFRS 16 Leases, which had a scheduled implementation date of 1 April 2020 at the time the Accounting Policies Report was circulated.

At its meeting on 27 March 2020, the Chartered Institute of Public Finance and Accountancy (CIPFA) and the Local Authority (Scotland) Accounts Advisory Committee (LASAAC) Local Authority Accounting Code Board (CIPFA/LASAAC) agreed to defer the implementation of IFRS 16 Leases to the 2021-22 financial year, with an effective date of 1 April 2021. This decision aligned with the proposals across the public sector but needed to be agreed by the Government's Financial Reporting Advisory Board (FRAB).

In December 2020, CIPFA LASAAC announced a further delay to the implementation of IFRS 16 Leases in the Code of Practice on Local Authority Accounting in the United Kingdom (the Code), until the 2022-23 financial year. This aligns with the decision at FRAB to establish a new effective date of 1 April 2022 for the implementation of IFRS 16. CIPFA LASAAC has taken this decision in response to pressures on council finance teams as a result of the Covid-19 pandemic.

The updated 2020-21 Accounting Policies therefore reflect the removal of the IFRS 16 Leases updates, which were previously approved by Members, and the reinstatement of the existing lease accounting standards and interpretations: IAS 17, IFRIC 4, SIC 12 and SIC 27. The updated 2020-21 Accounting Policies are unchanged to those in the approved 2019-20 Statement of Accounts. The 2020-21 Accounting Policies are attached at Appendix One.

CIPFA LASAAC is encouraging finance teams to continue their preparations for implementation and to look to the adoption of this standard in the 2022-23 financial year. Preparations are underway to ensure that the Council is ready for the introduction of IFRS 16. There are significant implications for the accounting treatment of leases. All leases will be recognised in lessee accounts, with a lease liability and a corresponding right-of-use asset.

In preparation for the previous expected implementation date, amendments had been made to the Council's Accounting Policies, replacing existing lease accounting standards and interpretations: IAS 17, IFRIC 4, SIC 12 and SIC 27. These amendments will be reviewed in readiness for update and inclusion in the Accounting Policies for 2022-23, which will be provided to Members for approval in March 2022.

The transition to accounting for leases as required by IFRS 16 entails a significant amount of work:

- to identify all the arrangements which fall within its scope;
- to ensure that all right-of-use property assets are valued appropriately;
- to set up the necessary master data within the financial systems to separately identify right-of-use assets in the Council's accounts;
- to calculate and process the bookkeeping entries to correctly reflect the lease liability and right-of-use asset value; and
- to develop and maintain a system to record these lease arrangements.

Over 90 contracts which contain leases relating to land and buildings have been identified to date. There are also expected to be arrangements which will be identified where the Council is holding over on a lease after the term has expired. Furthermore, it is anticipated that a large number of contracts entered into by the Council's schools, which will be in the scope of IFRS 16, will be discovered. It is estimated that the lease liabilities reported on the balance sheet will increase by between £5m and £9m, with an equivalent or greater increase to the value of the reported assets relating to these leases. The scale of this change means that the risk of the Statement of Accounts for 2022-23 being materially misstated as a result of an incorrect implementation is not insignificant.

However, progress on implementation has already been made. Regular meetings between technical and capital accountants and the valuers are taking place, to agree approaches to identifying contracts referencing property assets which are in scope and suitable valuation methodologies for property right-of-use assets. The majority of the surveys required to value the property right-of-use assets which have already been identified have been undertaken. A model to determine the value of the lease liabilities and the necessary accounting adjustments is well developed.

It should also be acknowledged that the requirement in IFRS 16 to revalue the right-of-use assets for all property leases with sufficiently regularity and to adjust lease liabilities for any relevant changes in indices will place an additional and ongoing burden on the Council's valuers and accountants.

The 2020-21 Accounting Policies have also been updated to reflect a change in Section 1.14, Non-Current Asset Valuation Methodology. Previously the 20% of non-current assets revalued under the five-year rolling programme of revaluations were revalued at 1 April for the financial year, with an impairment review at 31 March to consider whether any material degradation or other impairment had occurred during the financial year. The date of this revaluation has been amended to 31 March for the financial year and the requirement for an impairment review at 31 March has been removed, as it is no longer required.

2021-22 Accounting Policies

Appendix Two includes the proposed 2021-22 Accounting Policies. No changes have been made to the 2020-21 Accounting Policies. Additional technical guidance is likely to be received and it is possible that this will also impact on the 2021-22 accounting policies. Any further proposed amendments will be reported to Audit Committee in due course.

3 Considerations

In preparing this report the relevance of the following factors has been considered:- financial, human resources, legal and human rights, equality of opportunity, health, environmental, transport, property, crime and disorder and social value considerations.

4 Background Papers

Papers held electronically by Technical Section, Finance & ICT, Room 137, County Hall.

5 Officer's Recommendation

That Audit Committee:

- Approves the changes outlined above in relation to the Accounting Policies for 2020-21; and

- Approves the Accounting Policies for 2021-22.

PETER HANDFORD

Director of Finance & ICT

Public

Statement of Accounting Policies

For the Year Commencing 1 April 2020

ACCOUNTING POLICIES

INTRODUCTION

The Accounting Policies for Derbyshire County Council (the Council) have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code for Local Authority Accounting (the Code). Where there is no specific guidance in the Code, the Council has developed its own accounting policy which is aimed at creating information which is:

- Relevant to the decision-making needs of users; and
- Reliable, in that the financial statements:
    - Represent fairly the financial position, financial performance and cash flows of the entity;
    - Reflect the economic substance of transactions, other events and conditions and not merely the legal form;
    - Are neutral i.e. free from bias;
    - Are prudent; and
    - Are complete in all material respects.

This document outlines how the Council will account for all income, expenditure, assets and liabilities held and incurred during the 2020-21 financial year.

The accounting policies of the Council are updated annually to reflect any changes in IFRS, including changes in International Public Sector Accounting Standards (IPSAS), HM Treasury guidance, CIPFA guidance or any other change in statute, guidance or framework impacting on the authority's accounts.

The Accounting Policies of the Council as far as possible have been developed to ensure that the accounts of the Council are understandable, relevant, free from material error or misstatement, reliable and comparable. A Glossary of Terms can be found at the end of this document.

The document has been divided into four distinct categories which are Accounting Principles, Capital Accounting, Revenue Accounting and Treasury Management, with each policy being assigned a policy number.

ACCOUNTING PRINCIPLES

1.1. **Going Concern**

The Council prepares its accounts on the basis that it remains a going concern; that is that there is the assumption that the functions of the Council will continue in operational existence. In the case of a pending local government reorganisation, where assets and liabilities are due to be redistributed, the Council would still account on the basis of going concern as the provision of services would continue in another Council.

1.2. **Accruals Concept**

The Council accounts for income and expenditure in the period in which the provision of goods or service has taken place, rather than when cash payments are received or made.

Where income and expenditure has been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Equally, where cash has been received or paid which is not yet recognised as income or expenditure, a creditor (income in advance) or debtor (payment in advance) is recorded in the Balance Sheet.

1.3. **Cost of Services**

Internal support service costs (e.g. Human Resources) are apportioned across the core service areas to represent the total cost of delivering that service to the public, in accordance with the costing principles of the CIPFA Service Reporting Code of Practice 2020-21 (SerCOP).

Where possible the full cost of support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate and Democratic Core – costs relating to the Council's status as a multi-functional, democratic organisation.
- Non-Distributed Costs – the cost of discretionary benefits awarded to employees retiring early and any depreciation and impairment losses chargeable on non-operational properties, or any other operational cost that cannot be reasonably attributed to a specific service.

1.4. **Value Added Tax**

Income and expenditure treated as either capital or revenue, excludes any amounts related to VAT. All VAT collected is payable to HM Revenue & Customs and all VAT paid is recoverable from the same. Any amounts outstanding (payment or receipt) at the year-end date is held as a creditor or debtor after netting off the amounts either due or owed.

1.5. **Changes in Accounting Policy**

Where there is a known future change in accounting policy required by the CIPFA Code, the Council will disclose the following in the notes to the accounts:

- The nature of the change in accounting policy;

- The reasons why applying the new accounting policy provides reliable and more relevant information;
- For both the current reporting period, and the previous year comparatives reported, the extent to which the change in accounting policy would have impacted on the financial statements if it had been adopted in that year;
- The amount of adjustment relating to years previous to those reported in the set of financial statements, had the proposed policy been adopted retrospectively;
- If retrospective application is impracticable for a particular period, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.

The Council will also disclose information relating to an accounting standard which has been issued but not yet adopted.

1.6. Prior Year Adjustments

These typically arise from omissions and misstatements in the Council's financial statements for one or more prior periods. For the error to be a prior year adjustment, it would need to have arisen from a failure to use or misuse, reliable information that:

a) Was available when financial statements for those periods were authorised for issue; and
b) Could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements.

Such errors include the effects of mathematical mistakes, misunderstanding in applying accounting policies, oversights or misinterpretations of facts, and fraud.

They may also arise for reasons such as changes in Accounting Standards, which are required to be applied retrospectively.

Where required changes are thought to be significant, an adjustment will be entered into the financial statement's comparative year balances, and the columns headed 'restated'. In addition, full disclosure as to the nature, circumstance and value of the adjustment will be disclosed in the notes to the accounts.

Errors which are found and are not significant will not result in a prior year adjustment and will be corrected as a current year entry. In addition, errors as a result of information which was not known to the Council or could not have reasonably been obtained by the Council when the accounts were authorised for issue will also be treated as an in year adjustment.

1.7. Unidentified Income

All unidentified income received is initially coded to an income suspense account. Individual amounts below £10 are written off due to immateriality. Weekly updates of the content of the suspense accounts are circulated to finance departments, to ensure the balances are cleared quickly. Any items of income below £10,000 which remain unidentified for six months will be written off. Items above £10,000 will be written off after 12 months.

1.8. Events after the Balance Sheet Date

Where there is a material post balance sheet event before the date the accounts are authorised for issue, a disclosure in the notes to the accounts will be included. If this event provides additional evidence of conditions that existed at the Balance Sheet date, and materially affects the amounts to be included in the accounts; adjusting items will be shown in the accounts.

1.9. Exceptional Items

Exceptional items will have been disclosed separately on the face of the Comprehensive Income and Expenditure Statement and details will be disclosed in the notes to the accounts.

1.10. Contingent Assets and Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured reliably. They are not recognised in the Balance Sheet but disclosed in a note to the accounts.

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

CAPITAL ACCOUNTING

1.11. Recognition of Capital Expenditure (de-minimis Policy)

In accordance with International Accounting Standard 16 (IAS 16), the Council recognises non-current assets as:

- Assets where it is expected that future economic benefit or service potential will flow to the Council.
- Assets where the cost can be measured reliably.

and defines them as:-

- Assets held for use in the production or supply of goods or services, rental to others, or for administrative purposes.
- Assets expected to be used for more than one financial period.

The initial measurement of an asset is recognised to be:

- Purchase price, construction cost, minimum lease payments or equivalent including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.

- Costs associated with bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
- Initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located, the obligation for which the Council incurred either when the asset was acquired or as a consequence of having used the asset during a particular period for purposes other than producing inventories during that period.

Subsequent expenditure are costs incurred to add to, replace part of, or service the asset, but do not include day-to-day repairs and maintenance and are treated as capital when

- The expenditure will substantially increase the market value of the asset.
- The expenditure will substantially increase the extent to which the Council can use the asset for the purpose, or in conjunction with the functions of the Council.

Where a component is replaced, the carrying amount of the old component shall be derecognised to avoid double counting and the new component reflected in the carrying amount, subject to the recognition principles as set out above.

The Council has two levels of de-minimis for recognition of capital expenditure, £10,000 and £500,000:

- £10,000 and below – all expenditure at this level is deemed to be non-enhancing unless funded by a Capital grant, and therefore is charged to revenue as it is incurred. This includes initial recognition of assets and subsequent asset expenditure.
- Above £500,000 - expenditure meeting the definitions above will be treated as capital expenditure, either as initial recognition or as an enhancement. However, in order to ensure that the subsequent asset expenditure is enhancing the value of the asset, the Council will instruct a valuation of the asset by a Royal Institute of Chartered Surveyors (RICS) qualified valuer, and any impairment or additional enhancement recognised as necessary.
- Any expenditure above £10,000 and below £500,000 will be treated as capital expenditure as the amount is significant enough to increase the useful life of an asset, however is not material enough to warrant individual impairment review, until the time the asset would normally be valued.

Capital Assets are held on the balance sheet as non-current assets, unless otherwise stated.

The Council has assessed whether Voluntary Aided, Voluntary Controlled and Foundation Schools should be included within the balance sheet, based upon an assessment of ownership and control of the assets. Maintained schools are already held on the balance sheet as the Council controls these entities and therefore all transactions relating to maintained schools are recognised in these accounts. Other types of schools such as Voluntary Aided, Voluntary Controlled and Foundation schools are subject to a test of ownership. The Council recognises a school’s assets on its balance sheet where it directly owns them and/or the Council retains substantive rights over the assets and the future economic benefits/service potential of school assets flow to the Council or rights to use the assets have been transferred from another entity.

1.12. **Donated Assets**

These are acquired at less than fair value or transferred for nil consideration. When the Council receives a donated non-current asset, the initial recognition of the asset will be at fair value.

Once any condition attached to the donation has been satisfied, the credit which is the difference between any cash payment and fair value will be treated as income in the Taxation and Non-Specific Grant Income and Expenditure line in the Comprehensive Income and Expenditure Statement. To ensure there is no impact on Council Tax this will then be reversed in the Movement in Reserves Statement and credited to the Capital Adjustment Account.

Until the condition has been satisfied the credit will be recognised in the Donated Assets account. If there is no condition, the recognition of the credit in the Comprehensive Income and Expenditure Statement will occur upon acquisition of the asset.

The fair value of an asset will be assessed upon acquisition; this will be provided by a RICS qualified valuer for property assets and another relevant valuation specialist for other types of asset. After initial recognition, donated assets are treated in the same way as similar owned assets.

1.13. **Non-Current Asset Classification**

The Council manages its assets in the following categories:

- **Intangible Assets**
  In line with International Accounting Standard 38 (IAS 38), the Council recognises intangible assets as non-monetary assets without physical substance, where that asset meets the capital expenditure criteria set out in Accounting Policy 1.11.

- **Property, Plant and Equipment Assets**
  Property Plant and Equipment Assets are subcategorised into Operational Land & Buildings, Community Assets, Vehicles Plant Furniture & Equipment, Infrastructure Assets, Non-Operational Assets, these being Surplus Assets and Assets under Construction.
  - Land and/or Buildings Assets.
    These assets are recorded, valued and accounted for based on their significant components in line with IAS 16. The Council recognises a significant asset to be 25% of the total asset base within an asset class. A component would be recognised if its expenditure in a given financial year exceeds 25% of the total value of the significant asset and has a substantially different life to the overall asset:

  - Combined Group containing Flat Roof & Mechanical Engineering (Internal Works i.e. boiler system)
  - Land
  - Temporary Buildings (sheds / portacabins)
  - Combined group containing permanent structure, external works (i.e. car park), pitched roof and components of less than 25% of the overall structure value
  - Other unique features (e.g. a swimming pool)

- Community Assets
  These are assets that the Authority intends to hold in perpetuity, that have no determinable useful life and which may, in addition, have restrictions on their disposal. There is little prospect for sale or change of use.

  If the asset is used for a specific operational purpose, it does not qualify as a community asset and should be valued accordingly.

- Infrastructure Assets
  These include all tangible (physical) assets required within the Council's road networks. There is no prospect for sale or alternative use of infrastructure assets; expenditure is only recoverable through continued use of the asset.

- Vehicles, Plant Furniture and Equipment Assets and Assets Under Construction
  These assets are also classified as Property Plant and Equipment where they do not meet the criteria for Investment Property Assets or Assets Held for Sale.

- Non-Operational (Surplus) Assets
  Surplus assets are assets that are not being used to deliver services, and do not meet the criteria to be classified as either investment properties or held for sale. All surplus assets under IFRS13 which came into effect and were adopted by the Council from 1 April 2015 are to be valued at Fair Value and depreciated accordingly.

➢ **Investment Property Assets**

These are items of land and / or buildings held by the Council solely for the purpose of rental income generation or capital appreciation or both.

As such where there is a service of the Council being delivered from the property, this is not classified as Investment Property Assets. This includes where the intention of the asset is to generate economic growth to an area such as below market value rental.

Investment property that subsequently meets the criteria within the Code to be classified as held for sale shall continue to be accounted for as an investment property but may be reported separately as investment property held for sale.

Some Assets Under Construction may also be classified as Investment Properties where the intended eventual use is rental income generation or capital appreciation.

- **Heritage Assets**

Assets that are intended to be preserved in trust for future generations because of their cultural, environmental or historical associations are classified as Heritage Assets.

- **Assets Held for Sale**

The Council will classify assets as held for sale where all of the following criteria have been met:

- The asset must be available for immediate sale in its present condition. However, if a sale is dependent on planning permission being obtained, reclassification is suspended until that permission has been given.
- The asset's sale is highly probable.
- The asset must be actively marketed for sale.
- The completion of the sale is expected within 12 months from the date of classification.

In situations where it is not necessary to carry out active marketing, for example the Council is able to identify prospective purchases willing to pay a reasonable price without marketing or because the buyer initiates the transaction (such as a right-to-buy-sale) the actively marketed test is treated as 'not applicable', rather than failed.

Assets which become non-operational which do not meet all of the criteria set out as assets Held for Sale will be classified as surplus. If at a later point in time the asset no longer meets the criteria of Held for Sale, it is restored to its previous classification and all transactions which would have occurred shall be retrospectively applied as though the asset had never been held for sale.

Assets meeting the criteria as Held for Sale are held as current assets on the balance sheet as income is expected within 12 months.

It is possible that assets meeting the criteria to be Held for Sale; may undergo a change in circumstance beyond the control of the Council resulting in the sale being delayed beyond 12 months. In these instances, the Council follows the policies outlined for assets held for sale; however disclosure of the value for these assets is within non-current assets. Due to the circumstances around the definition, it is expected that this will occur very rarely.

1.14. **Non-Current Asset Valuation Methodology**

The various classifications of assets as outlined in Accounting Policy 1.13 are valued on a differing base. Where not explicitly stated otherwise, property revaluations are completed by a RICS qualified valuer (who is internal to the Council), over a 'short period', interpreted to mean on a five year rolling programme for each class of asset i.e. 20% of the Council's assets are revalued at 31 March for the financial year.

Where there is an upward revaluation, the carrying value is increased and the associated credit charged directly to the Revaluation Reserve. This is then reflected in the Comprehensive Income and Expenditure Statement as a revaluation gain. Where there is a revaluation resulting in a lower than carrying amount valuation, this is treated in line with Accounting Policy 1.15 – impairment of Non-Current Assets.

The Council, as per the reporting standard, values its assets and liabilities in accordance with section 2.10 of the Code of Practice on Local Authority Accounting in the United Kingdom to reflect the adoption of IFRS13 Fair Value Measurement at each reporting date except where adaptations to fit the public sector are detailed in the Code. However, Section 4.1 of the Code adapts IAS 16 to require that items of Property, Plant and Equipment that are operational and therefore providing a service potential for the authority are measured for their service potential at existing use value, existing use value – social housing, (depreciated) historic cost or depreciated replacement cost and not at fair value. Surplus assets are measured at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants and the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- In the absence of a principal market, in the most advantageous market for the asset or liability.

Fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the fair value of a non-financial asset, the Council takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Code requires all assets to be measured at Current Value and the basis of valuation will be determined using the following criteria:

- Depreciated replacement cost – specialised assets
- Existing use value – non-specialised assets
- Existing use value – social housing

Fair value for the following assets:

- Investment assets
- Surplus assets
- Assets Held for Sale (less costs to sell)

The Council uses valuation techniques, as required by the Code, which maximise the use of relevant observable inputs and minimise the use of unobservable inputs and that are appropriate in the circumstances and for which sufficient data is available.

Observable inputs are inputs that are developed using market data, such as publicly available information about actual events or transactions, and that reflect the assumptions that market participants would use when pricing the asset or liability.

Unobservable inputs are inputs for which market data is not available and that are developed using the best information available about the assumptions that market participants would use when pricing the asset or liability.

The Council follows the fair value hierarchy which categorises inputs to the valuation techniques in respect of assets and liabilities into three levels for which fair value is measured or disclosed in the Council's financial statements, these include:

- Level 1 inputs – unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 inputs – unobservable inputs for the asset or liability

Highest priority is given to Level 1 inputs (unadjusted) in active markets and lowest priority to Level 3.

Upon the revaluation of a Surplus Asset at the 31st March of the financial year, based on the inputs available at the date of valuation the valuer will establish the Code Valuation Input Level for the valuation and will compare this with the Code Valuation Input Level for the previous valuation. Where the Input Level is different from that of the previous valuation this will be specifically reported with the valuation together with a narrative description of the reasons and differing circumstances that have resulted in the change.

Valuations are completed under the Code as follows:

➢ **Intangible Assets –** the Council recognises Intangible Assets at cost. The Council will only revalue intangible assets annually where there is a determinable market value for the asset.

- **Property Plant and Equipment (PPE) –** Property Assets are held at current value which is the amount that would be paid for the asset in its existing use. This requirement is met by providing a valuation on the basis of Existing Use Value (EUV) in accordance with United Kingdom Practice Statement (UKPS) 1.3 of the RICS Valuation Standards. Where no other valuation method can be used because of the specialist nature of the asset, current value is estimated using a Depreciated Replacement Cost (DRC) approach. Vehicles, Plant, Furniture and Equipment, IT Hardware, and Assets Under Construction within PPE are held at historic cost (not valued).

- **Infrastructure Assets –** the Council recognises Infrastructure Assets at Depreciated Historical Cost.

- **Investment Property Assets –** Investment Properties are annually revalued at fair value which is interpreted as the amount that would be paid for the asset in its highest and best use, i.e. market value. An investment property under construction is measured at cost until such time as its fair value can be determined reliably or its construction us complete, whichever comes first. The fair value of Investment Property held under a lease is the lease interest.

- **Community Assets –** the Council recognises Community Assets at historic cost.

- **Heritage Assets –** where it is possible to determine a valuation for Heritage Assets, then the Council will recognise the asset in the Balance Sheet at that valuation. Where a valuation has been applied to this class of assets, other than a historic valuation, a range of valuation bases have been used which include external valuations, curatorial valuations and a limited number of cases of insurance valuations. Where a curatorial valuation has been applied the valuation is dependent upon the experience and knowledge of the Derbyshire Museums Manager. However, where it is not practicable to obtain a valuation the asset will be carried at historic cost. Where information on cost or value is not available all Heritage Assets will be disclosed in the notes to the accounts, even where they are not recognised in the Balance Sheet. Where there is evidence of impairment to Heritage Assets e.g. where an item has suffered a physical deterioration or breakage or new doubts arise as to its authenticity, any impairment is recognised and measured in accordance with the Council's general policies on impairment.

- **Assets Held for Sale –** Assets held for sale are, at initial classification and at the end of each reporting year, valued at the lower of carrying amount and fair value less costs to sell and depreciation on these assets should cease.

- **Surplus Assets** - Surplus assets are valued at Fair Value in accordance with the Code.

1.15. **Impairment of Non-Current Assets**

This accounting policy has been created in accordance with IAS 36.
Impairment is the amount to which the carrying value of an asset exceeds the recoverable amount.

At the end of each reporting period the Council assesses whether there is any indication that an asset may be impaired.

The Council recognises impairment as:

- A significant decline (i.e. more than expected as a result of the passage of time or normal use) in an asset's carrying amount during the period that is specific to the asset;
- Evidence of obsolescence or physical damage of an asset;
- A commitment by the Council to undertake a significant reorganisation; and
- A significant adverse change in the statutory or other regulatory environment in which the Council operates.

Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains). Any further impairment or if there has been no previous revaluation, the impairment is charged to revenue. This is then reversed through the Movement in Reserves Statement and charged to the Capital Adjustment Account.

1.16. **Disposal of Non-Current Assets**

When an asset is disposed of or decommissioned, the value of the asset in the Balance Sheet is written off to the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals are credited to the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Any revaluation gains in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Sale proceeds in excess of £10,000 are categorised as Capital Receipts. Receipts are credited to the Capital Receipts Reserve, and can then only be used for new capital investment or set aside to reduce the Council's underlying need to borrow (the Capital Financing Requirement). Receipts are transferred to the Reserve from the movement in reserves statement. The value of the asset is transferred to the Capital Adjustment Account via the Movement in Reserves Statement.
Sale proceeds of £10,000 and below are credited straight to the Comprehensive Income and Expenditure Statement.

1.17. **Depreciation / Amortisation Methodology**

In order to recognise the total cost of using fixed assets, the Council has a policy to depreciate assets on a straight line basis over their useful economic life, reducing the value of the asset, and charging the relevant revenue service expenditure. However, under statute, depreciation is not chargeable to the taxpayer, the Council removes this charge through the Movement in Reserves Statement and charges it to the Capital Adjustment Account.

The Council charges depreciation on a pro-rata basis during the year i.e. from the month of acquisition to the month of disposal.

The economic lives of assets are:

- **Intangible Assets –** 5 years.

- **Property Plant and Equipment**
    - Combined Group for Flat Roof and Mechanical Engineering – 20 years
    - Land – not depreciated
    - Temporary Buildings – 15 years
    - Modular Buildings – 25 years
    - Combined group for structure, external works, pitched roof and components of less than 25% of the overall structure value – 40 years
    - Other unique features (i.e. a swimming pool) – as required
    - Fixtures and Fittings – 10 years
    - IT Hardware – 5 years
    - Vehicles – 3 to 10 years

- **Infrastructure Assets**
    - Carriage ways – 40 years
    - Footways and cycle tracks – 40 years
    - Structures – 40 years
    - Lighting – 25 years
    - Traffic management – 25 years
    - Street furniture – 25 years

- **Investment Property Assets –** not depreciated

- **Community Assets –** Community Assets are assets that an authority intends to hold to perpetuity which have no determinable useful lives and as such are not depreciated.

- **Assets Held for Sale –** are not depreciated

1.18. Leases

In line with IAS 17, the Council recognises a lease to be any agreement which transfers the right to use an asset for an agreed period in exchange for payment, or a series of payments.

This includes leases, hire purchase, rental, contracts of service, service level agreements and any other arrangement where the ability to use an asset is conveyed.

1.19. **Defining a Finance Lease**

A finance lease is where substantially all of the risks and rewards relating to ownership transfer to the lessee.

Tests to give an indication of the transfer of risk and reward are:

- If the lessee will gain ownership of the asset at the end of the lease term (e.g. hire purchase)
- If the lessee has an option to purchase the asset at a sufficiently favourable price that it is reasonably certain, at the inception of the lease, that it will be exercised
- If the lease term is for the major part of the economic life of the asset even if the title is not transferred. Measures to identify this are:
  - The economic life of the asset is deemed to be that which is consistent with the class of asset in the depreciation policy.
  - The Council recognises 'major part' to be 75% of the life of the asset, unless on an individual case basis this would not give a true representation of the substance of the transaction.
- At the inception of the lease, the present value of the minimum lease payments amounts to at least substantially all of the fair value of the leased asset. Measures to identify this are:
  - Fair value of the leased asset is assessed by a RICS qualified valuer.
  - The present value of the minimum lease payments is calculated by discounting at the rate inherent in the lease.
  - If this rate cannot be determined the incremental borrowing rate applicable for that year is used.
  - The Council recognises 'substantially all' to be 75% of the value of the asset, unless on an individual case basis this would not give a true representation of the substance of the transaction.
- The leased assets are of such a specialised nature that only the lessee can use them without major modifications.
- If the lessee cancels the lease, the losses of the lessor, associated with the cancellation are borne by the lessee.
- Gains or losses from the fluctuation in the fair value of the residual accrue to the lessee (e.g. in the form of a rent rebate equalling most of the sales proceeds at the end of the lease).
- The lessee has the ability to continue the lease for a secondary period at a rent that is substantially lower than market rent.

A suitably experienced accountant, with assistance from qualified valuers, will make a judgement based on the level of risk and reward held by the Council as to whether a lease is operating or finance.

1.20. **Defining an Operating Lease**

The Council recognises an operating lease to be a lease which is not a finance lease.

1.21. Lessee Accounting for a Finance Lease

Where the Council is tenant in a property, or is, by definition of IFRIC 4, leasing an asset which is deemed under IAS 17 to be a finance lease the Council will recognise that asset within the asset register, and account for that asset as though it were an owned asset.

The initial recognition of the asset is at the fair value of the property, or if lower, the present value of the minimum lease payments. A liability is also recognised at this value, which is reduced as lease payments are made.

1.22. Lessor Accounting for a Finance Lease

Where the Council is the lessor for a finance lease, the asset is not recognised in the asset register; however, a long term debtor at the present value of minimum lease payments is recognised. Income received is split between capital - credited against the debtor, and finance income – credited to the Comprehensive Income and Expenditure Statement as interest receivable.

1.23. Lessor Accounting for an Operating Lease

Where the Council is the lessor for an operating lease, it will retain the property as either an item of Property Plant and Equipment or as an Investment Property on the Balance Sheet. Any rental income is credited to the relevant service income.

1.24. Service Concession Agreements (Private Finance Initiative (PFI) and other similar contracts)

PFI contracts are agreements to receive services, where the responsibility for making available the fixed assets needed to provide the services passes to the PFI contractor. PFI and similar contracts are assessed against criteria within IFRIC 12 Service Concession Arrangements to determine whether the risks and rewards incidental to ownership lie with the Council or the contractor.

Those which lie with the contractor – payments made during the life of the contract are chargeable to revenue as incurred.

Those which lie with the Council – are recognised as an asset in the Balance Sheet for the construction costs of the asset. Once recognised this asset is treated in line with all capital assets. A corresponding long-term liability is also recognised at the construction value. Payments made during the life of the contract are split into finance costs, capital costs and service costs. Determining the split of payments is calculated at the inception of the contract and is based on the inherent interest rate within the original agreement. Finance costs are chargeable to the Comprehensive Income and Expenditure Statement as Interest payable. Capital Costs reduce the level of liability in the Balance Sheet. Service costs are chargeable to the relevant revenue service expenditure. Pre-payments or Dowry payments reduce the level of liability at the start of the contract.

PFI Credits are treated as general revenue government grants.

1.25. Capital Grants and Contributions

The Council recognises capital grants and contributions as being related to capital assets and uses them to fund capital expenditure on those assets. Grants, contributions and donations are recognised as income at the date that the Council has satisfied the conditions of entitlement, and there is reasonable assurance that the monies will be received.

Any grant received before these recognition criteria were satisfied would be held as a creditor. Any grant which had met the recognition criteria but had not been received would be shown as a debtor. This is in line with the Accruals Concept Policy.

Once the recognition criteria above have been satisfied, capital grants are recognised as income in the Comprehensive Income and Expenditure Statement.

In order to not impact on the level of Council Tax, the Council removes the credit from the General Reserves through the Movement in Reserves Statement and makes a credit to the Capital Grants Unapplied Reserve.

Once expenditure has been incurred on the related asset, the credit is removed from the Capital Grants Unapplied Reserve and credited to the Capital Adjustment Account.

1.26. Revenue Expenditure Funded from Capital Under Statute (REFCUS)

Expenditure incurred that either may be capitalised under statutory provisions or is capital in nature but does not result in the creation of a fixed asset that is owned by the Council. REFCUS is charged as expenditure to the Comprehensive Income and Expenditure Statement in the year, however, is financed from existing capital resources or by borrowing. A transfer between the Capital Adjustment Account and the Movement in Reserves Statement then reverses out the impact on the general fund balance.

1.27. Minimum Revenue Provision (MRP)

The Council is not required to raise Council Tax to cover depreciation, impairment losses or amortisations. However, it is required to make an annual provision from revenue to contribute towards the reduction in its overall borrowing requirement.

The Council will provide for 2.5% of debt outstanding on all debt as at 31 March 2008. On any new debt since this date the Council will provide 2.5% of the balance on all borrowing, unless any unsupported borrowing relates to any significant assets with a life of less than 20 years. In this case an annual amount based on the expected useful life of the individual assets is used and where those assets are vehicles then an average life of five years is used.

The Council has adopted the policy of charging MRP for PFI and Leased Assets at the value of the associated loan liability repayment each year, thus mitigating the impact to the General Reserve.

1.28. **Capital Reserves**

The Council holds Capital Reserves for the purpose of financing capital expenditure. Reserves will be disclosed as either usable (available to fund capital expenditure) or unusable (reserves held as a result of timing differences associated with recognition of capital expenditure and related financing).

Movements in capital reserves are accounted through the Movement in Reserves Statement.

REVENUE ACCOUNTING

1.29. **Recognition of Revenue Expenditure**

The Council recognises revenue expenditure as expenditure which is not capital.

1.30. **Employee Costs**

In accordance with IAS 19, the Council accounts for the total benefit earned by employees during the financial year.

Employee Costs are split into 3 categories; short term benefits, termination benefits and pensions costs.

Short Term Employee Benefits

- **Salaries and Wages –** The total salary and wages earned by employees during the financial year are charged to the Comprehensive Income and Expenditure Statement. Where the amount accrued exceeds the amount paid at the 31 March, a creditor will be reflected in the accounts.

- **Leave Owed, Accumulating Absences –** The Council allows employees to earn time off in one period with the resulting cost to the Council in a later period when that time is either taken off or paid to the employee. Examples of this accumulating leave are annual leave, flexi-time and time off in lieu.

  If an employee were to leave the Council, cash payment would be made for entitlements such as annual leave; this leave is termed vesting. Where no cash payment would be due, the leave is termed non-vesting.

  In order to correctly reflect the cost of time owed to staff, a charge has been made to the Comprehensive Income and Expenditure Statement and a creditor accrual has been reflected in the Balance Sheet. This charge is reflective of the estimated time cost value of all accumulating leave owed to employees. Vesting leave will be charged in full; however non-vesting leave has been adjusted to reflect the turnover of staff.

- **Easter Bank Holiday –** When Good Friday and/or Easter Monday fall in April, the preceding financial year only accounts for 6 or 7 bank holidays rather than the statutory 8. When this occurs, a charge is made to the Comprehensive

Income and Expenditure Statement and a creditor accrual is reflected in the Balance Sheet.

- **Non-accumulating Absences –** are periods of leave that cannot be carried forward for use in future periods. Examples include Maternity Leave, Special Leave, Sick Leave and Jury Service. The Council does not recognise non-accumulating compensated absences until the time that the absence occurs.

- **Non-monetary Benefits –** Where employees have non-monetary benefits (e.g. retirement benefits or life insurance), the associated cost of providing that benefit has been charged to the Comprehensive Income and Expenditure Statement.

Termination Benefits

- **Redundancy Costs –** The obligation to pay redundancy costs occurs when there is a formal plan to create redundancies. The plan would include the location, function and approximate number of employees affected; the termination benefits offered; and the time of implementation. When these recognition criteria have been met the Council recognises the costs associated with this in the service revenue expenditure and creates a creditor in the Balance Sheet. Where the payable amount is due in more than 12 months from the year end date, the costs are discounted at the rate determined by reference to market yields. In the case of an offer to encourage voluntary redundancy, the Council has recognised the estimated cost based on the expected number of employees taking the offer.

The Council will disclose details of exit packages within the notes to the accounts.

Pensions Costs

- **Teachers' Pension Scheme –** is a defined benefit scheme administered by the Department for Education. The assets and liabilities of the Teachers' Pension Scheme are not attributable to the Council, therefore the Council accounts for the scheme as if it were a defined contribution scheme. This means that the Children and Education Services line in the Comprehensive Income and Expenditure Statement will only include the Council's contributions payable to the scheme.

- **Local Government Pension Scheme –** is a defined benefit scheme. The liabilities of the scheme attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions such as mortality rates and employee turnover rates, and projections of earnings for current employees.

  Pension liabilities are measured using the projected unit method, discounted using the rate on high quality corporate bonds of equivalent term to the liabilities. The discount rate is the weighted average of "spot yields" on AA rated corporate bonds.

- Secondly, whether there is evidence of a significant increase for groups of similar debtors or investments.

The Council adopts the simplified approach of measuring the loss allowance for debtors at an amount equal to the total lifetime credit losses expected from a default event, from the time a debtor is initially recognised.

No loss allowance is recognised for expected credit losses where the debtor or investment issuer is central government or another local authority for which relevant statutory provisions prevent default.

Loss allowances are offset against the debtor or investment amount shown as an asset. The movement in the allowance is charged to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

TREASURY MANAGEMENT

1.41. **Definition of Treasury Management Activities**

The Council has adopted the following definition of Treasury Management activities:

The management of the Council's cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.

The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the Council.

The Council acknowledges that effective treasury management will provide support towards the achievement of its service objectives. It is therefore committed to the principles of achieving best value in treasury management, and to employing suitable performance measurement techniques, within the context of effective risk management.

1.42. **Cash and Cash Equivalents**

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in no more than three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in the value.

1.43. **Financial Liabilities**

Financial liabilities are initially measured at fair value and carried at their amortised cost.

Annual charges to the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. For most of the borrowings that the Council has, this means that the amount presented in the Balance Sheet is the outstanding principal repayable plus any interest accrued to 31 March and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year in the loan agreement.

Any premiums or discounts, incurred on the early repayment of loan debt, arising from 1 April 2007 are taken immediately to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement in the year of repayment. However, the amount is then credited or debited to the General Reserve and transferred to the Financial Instruments Adjustment Account via the Movement in Reserves Statement as required by statute.

The regulations allow that the premium or discount is amortised over periods specified in the statutory guidance. In accordance with the guidance the Council has a policy of spreading the premium or discount over the remaining term of the original loan, or a minimum of 10 years in the case of discounts. This amortisation is managed by a transfer from the Financial Instruments Adjustment Account to the General Reserve via the Movement in Reserves Statement.

Where a loan has been restructured, by a modification to the terms of the existing loan or by an exchange of debt instruments with the existing lender, and the terms are substantially different, the original financial liability is extinguished and a new financial liability is recognised. The difference between the carrying amount of the new and extinguished liability and any consideration transferred is recognised in Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

Where the terms of a loan debt exchange or the modification to the terms of an existing loan are not substantial, the carrying amount of the liability is adjusted to the value of the remaining cash flows required by the new terms, including any premiums or discounts paid/received, discounted to present value at the original loan’s effective interest rate. Any gain or loss on modification is credited and debited to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

A modification of terms is deemed to be substantially different if the present value of the cash flows under the new terms, including any premiums or discounts paid/received, is at least 10% different from the present value of the cash flows under the old terms. In both cases the present value is calculated by reference to original loan’s effective interest rate.

1.44. **Financial Assets**

Financial assets are classified into three types according to the Council's business model for managing those assets and the characteristics of the cash flows of the asset:

1) **Financial Assets Measured at Amortised Cost** – assets where it is the Council's intention to hold the asset to collect the contractual cash flows and those cash flows consist solely of payments of principal and interest which arise on specified dates

Loans and receivables are initially measured at fair value and carried at their amortised cost. Annual credits to the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable plus any interest accrued to 31 March and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement. However, the Council could make loans to organisations at less than market rates (soft loans).

When soft loans are made, a loss is recorded in the Comprehensive Income and Expenditure Statement for the present value of the interest that will be foregone over the life of the instrument, resulting in a lower amortised cost than the outstanding principal. Interest is credited at a marginally higher effective rate of interest than the rate receivable from the voluntary organisations, with the difference serving to increase the amortised cost of the loan in the Balance Sheet. Statutory provisions require that the impact of soft loans on the General Reserves is the interest receivable for the financial year – the reconciliation of amounts debited and credited to the Comprehensive Income and Expenditure Statement to the net gain required against the General Reserves is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the Comprehensive Income and Expenditure Statement. Any gains and losses that arise on the derecognition of the asset are credited/debited to the Comprehensive Income and Expenditure Statement.

Investments are represented on the balance sheet depending on their remaining life at the Balance Sheet date:

- Investments entered into for 90 days or less - debited to the cash balance as cash equivalents and represented within the cash flow statement.
- Investments entered into for more than 90, with less than 365 days until maturity – debited to current asset investments
- Investments due to expire in more than 365 days – debited to non-current asset investments

2) **Financial Assets Measured at Fair Value Through Other Comprehensive Income** – assets where it is the Council's intention to hold the asset both to sell the asset and to collect the contractual cash flows and those cash flows consist solely of payments of principal and interest which arise on specified dates, or assets which are equity instruments which it is the Council's intention to hold for more than 12 months and which the Council has irrevocably elected to present changes to their fair value in Other Comprehensive Income and Expenditure

These assets are initially measured and carried at fair value. Where the asset has determinable payments of dividends or interest, these are credited to the Comprehensive Income and Expenditure Statement. Interest receivable is based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Dividends are recognised when the Council's right to receive the payment has been established and the amount can be measured reliably.

Values are based on the following principles:

- instruments with quoted market prices – the market price
- other instruments with fixed and determinable payments – discounted cash flow analysis

Changes in fair value are balanced by an entry in the Financial Instrument Revaluation Reserve and the gain/loss is recognised in Other Comprehensive Income and Expenditure and the Movement in Reserves Statement. Impairment of these assets, due to expected credit losses, is charged to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement and credited to a loss allowance account which reduces the carrying value of the financial asset. Any gains and losses that arise on de-recognition of the asset are credited/debited to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement, along with any accumulated gains/losses. Where fair value cannot be measured reliably, the instrument is carried at cost (less any impairment losses).

3) **Financial Assets Measured at Fair Value Through Profit or Loss** – assets which are neither measured at amortised cost nor where changes to fair value are presented in Other Comprehensive Income and Expenditure

These assets are initially measured and carried at fair value. Where the asset has determinable payments of dividends or interest, these are credited to the Comprehensive Income and Expenditure Statement. Interest receivable is based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Dividends are recognised when the Council's right to receive the payment has been established and the amount can be measured reliably.

Values are based on the following principles:

- instruments with quoted market prices – the market price

- other instruments with fixed and determinable payments – discounted cash flow analysis

Changes in fair value are balanced by an entry in Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

1.45. **Interests in Companies and Other Entities**

Where the Council has material interests in companies and other entities that have the nature of subsidiaries, associates and joint ventures, it is required to prepare group accounts. In the Council's own single-entity accounts, the interests in companies and other entities are recorded as investments, i.e. at cost, less any provision for losses.

AA rated corporate bonds

Financial indicator of very good quality, low risk debt securities. These are assigned by credit rating agencies such as Moody's, Standard & Poor's and Fitch Ratings to have letter designations (such as AAA, B, CC).

Account

A group of expenditure items or balances with similar qualities will be summated into an ‘account’ balance such as an individual reserve account, or revenue expenditure account.

Accounting Policies

The Councils document outlining how it will account for all of its operations.

Accounting Principles

Commonly accepted set of concepts or assumptions that have to be followed when producing financial statements.

Accounting Standard

Statutory guidelines which explain how to treat financial activities in the financial statements. See International Financial Reporting Standards (IFRS).

Accrual

The accruals concept requires that the cost or benefit of a transaction is shown in the period to which the goods or services are received or provided, rather than when the cash is paid or received.

Accruals Concept

Requires operations of the Council to be reported in the financial statements at the point which they took place, rather than when the cash was paid or received.

Accumulating Absences

Types of leave which employees are entitled to each year; which if untaken in one financial year will be added to the entitlement for the following year.

Acquired / Acquisition

Operations or assets which have become the responsibility of the Council, such as through purchase, a Government reorganisation, donation or merger.

Actuarial

The estimation technique applied when estimating the liabilities to be recognised for defined benefit pension schemes in the financial statements of an organisation.

Actuaries

An actuary is a professional who deals with the financial impact of risk and uncertainty. Actuaries provide assessments of financial systems and balances.

Amortisation

The term used to describe the charge made for the cost of using intangible fixed assets. The charge for the year will represent the amount of economic benefits consumed for example wear and tear.

Amortised Cost – Financial Instruments

The valuation of a financial asset or liability based on repayments of principal, interest accrued at a constant rate and the difference between the initial amount recognised and the maturity amount. For financial assets this is adjusted by any loss allowance.

GLOSSARY OF TERMS

Amortised Cost – Other Non-Current Assets
The cost of intangible assets reduced by the amount of amortisation charged to date.

Annual Leave
Yearly entitlement of paid time off for Council staff.

Asset Register
Listing of all property (for example land, buildings, furniture, infrastructure, software) owned by the Council. The register holds all financial information relating to the asset.

Assets
Right or other access to future economic benefits.

Assets Held For Sale
Non-Current Assets which meet the relevant criteria to be classified as held for sale.

Assets Under Construction
Assets which are in the process of being constructed and are not yet operational.

Associates
An entity (including partnerships) which is not a subsidiary or joint venture, where the Council has significant influence.

Authorised For Issue
The date which the financial statements have been certified by External Audit and signed the relevant Officers and Members of the Council.

Balance Sheet
Shows all balances including reserves, long-term debt, fixed and net current assets, together with summarised information on the fixed assets held.

Balance Sheet Date
The date at which the Council reports its financial statements. For Derbyshire County Council, this date is the 31 March.

Bias
Influence or direction.

Billing Authorities
Councils who are responsible for issuing Council Tax Invoices and collection of income from local residents. The relevant share of that income is then transferred to the Council**.**

Borrowing Requirement
The amount required to be loaned from Money Markets or other financial institutions or Councils in order to support capital expenditure.

Business Rates
Local property taxation issued to businesses, similar to Council Tax on residential properties. Also known as National Non Domestic Rates (NNDR).

Cabinet
Sub-committee of elected Councillors representing the functions and portfolios of the Council.

Capital
Assets which have a long term value (more than one year) to the Council such as Buildings.

Capital Adjustment Account
Capital reserve largely comprising of resource applied to capital financing and is not available to the Council to support new investment.

Capital Appreciation
Increase in the worth of assets over time due to changes in market conditions or enhancements to the asset.

Capital Costs
Reflects the element of annual payment for PFI or Leased assets which is in relation to the reduction in the long term debt associated with the asset.

Capital Expenditure
Expenditure on the acquisition of, or enhancement to fixed assets. This cannot be merely to maintain the value of an existing asset.

Capital Financing Requirement
The Capital Financing Requirement measures the amount of capital spending that has not yet been financed by capital receipts, capital grants or contributions from revenue income. It is a measure of the underlying need to borrow for a capital purpose.

Capital Grant
Grant which is intended to fund capital expenditure.

Capital Grants Unapplied Reserve
Balance of capital grants received which is available to finance future capital expenditure.

Capital Receipts
Income received from the sale or utilisation of property, such as sale proceeds or rental income on finance leases.

Capital Reserves
Reserve balances held for capital purposes.

Carrying Value
The amount at which an asset is recognised after deducting any accumulated depreciation and impairment losses.

Cash Flow Statement
This consolidated statement summarises the inflows and outflows of cash arising from transactions with third parties for revenue and capital purposes.

Cash Flows
Monies received or paid either as cash or bank transactions. Cash inflow denotes money received, cash outflow denotes money paid.

Chartered Institute of Public Finance And Accountancy (CIPFA)
The main authority on accountancy and financial management for the public services in the UK.

CIPFA Code
A publication produced by the Chartered Institute of Public Finance and Accountancy (CIPFA) that provides comprehensive guidance on the content of a Council's Statement of Accounts

Collection Fund
The fund maintained by authorities who have responsibility to bill Council Tax and Non-Domestic Rate payers (billing authorities).

Collection Fund Adjustment Account
Revenue reserve to represent the difference between the income received by a local authority in Council Tax and the amount attributable to them.

Collection Fund Statements
The statutory financial statements produced as part of the Statement of Accounts by authorities who have responsibility to bill Council Tax and Non-Domestic Rate payers (billing authorities).

Community Assets
Assets which are held for the benefit of the community where there is no determinable useful life.

Comparative Year
The previous year to that which is being reported.

Component Accounting
The concept that individual parts of an asset (such as land, building, roof, sheds) should be treated differently in the financial statements dependent on the expected useful life or value of those individual parts. The concept expects that some parts of an asset require repair or replacement sooner than others.

Comprehensive Income And Expenditure Statement
Financial Statement detailing the revenue operations of the Council. This represents the private sector equivalent of a Profit and Loss Statement.

Condition
A requirement which must be met for an asset or liability to be recognised by the Council. For example, a donation which can only be spent within a specific service area such as museums or to support children.

Contingent Assets And Liabilities
A possible asset or obligation that arises from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Council.

Contract Asset
The Council's right to receive consideration in exchange for goods or services that it has transferred to a service recipient where that right is conditional on something other than the passage of time (such as the Council's future performance).

Contract Liability
The Council's obligation to deliver goods or services to a service recipient for which it has already received consideration.

Contributions
Income received by the council which is not a grant, donation, fine, or in direct exchange for goods or services.

Core Service Areas

The services provided by the Council externally, such as education, highway maintenance and adult social care.

Corporate And Democratic Core

Costs associated with maintaining a democratic representation and management within the Council. For example Members Allowances and administrative costs associated with supporting elected Members.

Council

The Council comprises all of the democratically elected Councillors who represent the various electoral divisions.

Council Tax

Council Tax is a local taxation that is levied on dwellings within the local Council area, and funds all Council services.

Credit

A credit represents income to a revenue account.

Credit Loss

The difference between contractual amounts due to the Council and the amounts it expects to receive.

Creditor

Represents the amount that the Council owes other parties.

Current Service Cost

The current service cost is the increase in the value of the pension schemes future pension liabilities arising from the employees on-going membership of the pension scheme.

Current Value

IFRS13 introduces the concept of current value and defines it as the measurements that reflect the economic environment prevailing for a service or function the asset is supporting at the reporting date. Current value can be fair value, existing use value, existing use value – Social Housing and depreciable replacement cost.

Current Year Entry

A transaction which has occurred in the financial year being reported.

Curtailments

Materially reducing the expected years of future services of current employees or eliminating for a significant number of employees the accrual of defined benefits for some or all of their future services.

Debit

A debit represents expenditure against a revenue account.

Debt Outstanding

The remaining principal balance owed on a loans or investments.

Debtors

Represents the amounts owed to the Council.

Equity Instrument

A contract which evidences a residual interest in the assets of another entity after deducting all of its liabilities. Examples include shares and derivatives that give the Council the right to receive a fixed number of shares for a fixed amount of cash (or another financial asset) in an exchange which is expected to be favourable to the Council.

Defined Benefit Scheme

Also known as a Final Salary Scheme. Pension scheme arrangement where the benefits payable to the members are determined by the scheme rules. In most cases there is a compulsory members' contribution but over and above this all costs of meeting the quoted benefits are the responsibility of the employer.

Defined Contribution Scheme

Also known as a Money Purchase Scheme. Pension scheme arrangement where the employer's liability is restricted to the amount that they contribute. Benefits payable to the members depend on the performance of the invested contributions of the members and the employer, the level of contributions invested, the charges deducted by the product provider and the annuity rate at retirement.

De-Minimis

Minimum level required. For example expenditure below the capital de-minimis is below the minimum level required to be treated as a capital expenditure item.

Department For Education

Central Government Department, responsible for education and children's services in England.

Depreciable Replacement Cost (DRC)

DRC is a method of valuation that provides the current cost of replacing an asset with its Modern Equivalent Asset less deductions for all physical deterioration and all relevant forms of obsolescence and optimisation.

Depreciation

The term used to describe the charge made for the cost of using tangible fixed assets. The charge for the year will represent the amount of economic benefits consumed by, for example, wear and tear.

Derecognition

The process whereby a component is replaced to avoid double counting when no future economic benefits or service potential are expected from its use or upon disposal.

Discount

An allowance received through the early repayment of debt.

Discounted

Reflecting the equivalent value today of a payment or income made or due in the past or future.

Discounted Cash Flow

A method of analysing future cash flows, by removing the impact time has on the value of money, and producing an equivalent current value (present value).

Discretionary Benefits

Benefits given to employees which are not statutorily obliged.

Disposal

Operations or assets which have left the responsibility of the Council, such as through sale, a Government reorganisation, donation or merger.

Donated Assets

Assets which have been acquired at below market cost.

Dowry

One off payment made as donation, contribution or pre-payment of an obligation.

Earmarked Reserves

Reserve balances which have been set aside for future spending in a specific area.

Economic Life

The number of years the Council is expected to receive economic benefits to deliver services.

Effective Rate

The interest rate embedded within a contract or lease, allowing for regular annual payments and the time value of money.

Employee

A person who holds an office within the Council, but does not include a person who is an elected Councillor.

Employee Benefits

Monetary or other awards to employees of the Council in exchange for services provided. For example, pay, holidays, and pensions.

Employee Costs

The costs directly associated with employees, including but not exhaustively salaries and wages, National Insurance contributions and pension's costs.

Employer Contributions

The payments made to an employee's pension scheme by the Council.

Enhancement Expenditure

Expenditure which increases the value of an asset.

Entity

Something with a legal status such as the Council, a company, or an individual.

Events After The Balance Sheet Date

An event which occurs between 31 March and the date that the accounts are signed which would alter the conclusion reached by any reader of the accounts.

Exceptional Items

Material items that result from the ordinary activities of the Council, but to a value so significantly abnormal that is not expected to recur at that level.

Existing Use Value (EUV)

The value of an asset based on what it is currently being used for. For example, two identical buildings in construction and design may have different values where one is used as a school and another is used as offices.

Exit Packages

The payment made to an employee upon leaving the Council.

Expenditure

Payments made of goods or services.

Fair Value

The income that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair Value Through Other Comprehensive Income (FVOCI)

Measurement of a financial asset at fair value where any gain or loss on revaluation is recognised in other comprehensive income and expenditure and taken to the Financial Instrument Revaluation Reserve.

Fair Value Through Profit or Loss

Measurement of a financial asset at fair value where any gain or loss on revaluation is recognised as a credit or charge to Surplus or Deficit on Provision of Services within the CIES.

Finance Income

Interest receipts.

Finance Lease

A lease that transfers substantially all of the risks and rewards of ownership of a fixed asset to the lessee.

Financial Assets

A type of financial instrument which gives the Council the right to receive future economic benefits.

Financial Instruments

An umbrella term to describe all financial services and trading with which the Council may operate, including loans, borrowings, bank accounts and debtors.

Financial Instruments Adjustment Account

Revenue reserve which records the timing differences between the rate at which gains and losses are recognised and the rate at which debits and credits are required to be made against Council tax.

Financial Instruments Revaluation Reserve

This reserve contains the cumulative gains and losses relating to the valuation of financial assets held at fair value through other comprehensive income. When the underlying financial assets are de-recognised any gains or losses held in this reserve are credited or expensed to the Surplus or Deficit on Provision of Services.

Financial Liabilities

A type of financial instrument that confers an obligation on the Council to transfer economic benefits under its control.

Financial Statements

Published document, consisting of the Balance Sheet, Comprehensive Income and Expenditure Statement, Movement in Reserves Statement, Cash Flow Statement and Notes to the Accounts.

Financial Year

The current year being reported upon running from 1 April to 31 March.

Five Year Financial Plan

The Councils Medium Term Financial Plan, setting out the financial projection for the Council over the coming 5 years.

Fixed Assets

See Non-Current Assets.

Flexi-Time

Time owed to employees who have worked above the contracted hours.

Gain

Where income exceeds expenditure.

General Provisions

Money set aside in the Balance Sheet where its future use is not known.

General Reserve

The reserve held by the County Council for general purposes, i.e. against which there are no specific commitments.

General Revenue Government Grants

Grant income received from Central Government (or Government Department) which is not restricted in its use.

Going Concern

The going concern accounting concept assumes that the organisation will not significantly curtail the scale of its operation in the foreseeable future.

Goods Or Services

Supplies required by the Council to perform its operations. Examples of goods; paper, bricks or light bulbs, and services; electricity, petrol or agency staff.

Grants

Payment towards the cost of local authority services. These are either for particular purposes or services (specific grants) or in aid of local services generally (formula grant).

Group Accounts

Where a Council has a controlling interest in another organisation, group accounts have to be produced. These accounts report the financial position of all of the group entities.

Hire Purchase

A contract for the provision of an asset which becomes the property of the lessee at the end of the contract period.

Historic Cost

The cash paid in obtaining an asset in its current form. Inclusive of purchase price and enhancement expenditure.

HM Revenue & Customs

Her Majesty's Revenue and Customs is a non-ministerial department of the UK Government responsible for the collection of taxes, the payment of some forms of state support, and the administration of other regulatory regimes including the national minimum wage.

HM Treasury

Her Majesty's Treasury, sometimes referred to as the Exchequer, or more informally the Treasury, is the United Kingdom government department responsible for developing and executing the British government's public finance policy and economic policy.

IFRIC

International Financial Reporting Interpretation Committee.

Immateriality

Immateriality is an expression of the relative insignificance or unimportance of a particular matter in the context of the financial statements as a whole.

Impairment

Impairment is the amount by which the carrying amount of an asset exceeds its recoverable amount.

Inception

The point in time which something began such as a project, contract or lease.

Income

Cash flows into the Council.

Income From Service Recipients

Consideration a party, that has contracted with the Council, has given in exchange for goods or services that are the output of the Council’s normal operating activites. Such a contract may be in writing, orally or in accordance with customary business practices.

Income In Advance

Income received before the point at which an obligation to receive it has occurred.

Infrastructure

A network and grouping of inalienable components, expenditure on which is only recoverable by continued use of the asset created i.e. there is no prospect of sale or alternative use. The inalienable components include carriageways, footways, cycle tracks, structures, street furniture, street lighting, traffic management systems and land.

Intangible Asset

Non-current assets which do not have physical form such as software.

Interest Accrued

Accrued interest is the interest on a bond or loan that has accumulated since the principal investment or since the previous coupon payment if there has been one already.

Interest Payable

The amount of interest due for payment within a financial year.

Interest Rate

The rate at which interest is calculated on a loan or investment.

Interest Receivable

The amount of interest due for receipt within a financial year.

International Accounting Standards (IAS)

Regulations outlining the method of accounting for activities, IAS's are currently being replaced with International Financial Reporting Standards (IFRS's) issued by the International Accounting Standards Board.

International Financial Reporting Standards (IFRS)

Regulations outlining the method of accounting for activities, issued by the International Accounting Standards Board.

International Public Sector Accounting Standards (IPSAS)

Public Sector regulations outlining the method of accounting for activities.

Inventories

Goods purchased in advance of their use which are held in store.

Investment Property

Assets held solely for the purposes of rental generation or for increasing the value pre-sale (capital appreciation) or both.

Joint Venture

An organisation which the Council has partial control and ownership, but decisions require the consent of all participants.

Lease

Financial contract for the continuing use of an asset.

Lease Interest

The interest rate inherent within a lease allowing for regular rental payments and an adjustment for the time value of money.

Lease Payments

Regular payment made in exchange for the use of an asset.

Leases

A method of funding expenditure by payment over a defined period of time.

Lessee

The person or organisation that is using or occupying an asset under lease (tenant).

Lessor

The person or organisation that owns an asset under lease (landlord).

Liabilities

An obligation to transfer economic benefits. Current liabilities are payable within one year.

Loans And Receivables

Financial assets which are not quoted in an active market and have either a fixed or determinable payment.

Loan Modification

A change to the terms of an existing loan. Changes may include a reduction in the interest rate, an extension of the loan term, or a reduction in the principal balance.

Loan Modification Gain/Loss

An amount arising from adjusting the carrying value of a loan to reflect the cash flows under the renegotiated terms of the loan, but accruing interest at the rate specified in the original loan terms.

Long Term Debtor

Income due in more than 365 days of the balance sheet date.

Long Term Liability

Payment due in more than 365 days of the balance sheet date.

Loss

Where expenditure exceeds income.

Loss Allowance

A reduction to the value of financial assets for the expected credit losses relating to those assets.

Materiality / Material

Materiality is an expression of the relative significance or importance of a particular matter in the context of the financial statements as a whole.

Maternity Leave

Statutory time off due to pregnant women and new mothers.

Members

Elected Councillors responsible for the democratic leadership of the Council.

Members Allowances

Allowances paid to members in association with their roles and responsibilities.

Minimum Lease Payments

The minimum which will be paid or received over the life of a lease agreement.

Minimum Revenue Provision (MRP)

A prudent amount of revenue set aside to contribute towards capital expenditure which has been financed by borrowing or credit arrangements.

Misstatement

An error whereby something was included in the accounts wrongly.

Modern Equivalent Asset (MEA)

The MEA should give the same service and performance as the existing asset, but should use modern materials and technology.

Movement In Reserves Statement (MiRS)

The statement detailing the movement in the reserves of the Council.

Net Cost Of Services

The direct cost of delivering the Councils services after allowing for specific income received by those services.

Net Operating Expenditure

The cost of operational items which are not direct services, such as disposing of the Councils assets, after allowing for specific income received.

Net Realisable Value

The estimated selling price of an asset in the ordinary course of operations less any completion costs and costs to make the sale, exchange or distribution.

Non Distributed Costs

The value of revenue operating expenditure that is not able to be apportioned to one of the authorities core service areas.

Non-Accumulating Absences

Types of leave an employee may take in a financial year, which if are not taken do not get added to the following year’s entitlement. For example Sick Leave.

Non-Current Assets

Assets that yield benefits to the Council for a period of more than one year, examples include land, buildings and vehicles.

Non-Vesting

An obligation which cannot be settled by a monetary payment.

Notes To The Accounts

A set of supplementary comments, tables and information which further explains the main Financial Statements.

Obligation

The requirement to transfer economic benefits.

Operating Lease

A lease where an asset is used only for a small proportion of its economic life.

Operational

The normal activities of the Council.

Past Service Cost

Past service cost is the change in the present value of defined benefit obligations caused by employee service in prior periods.

Payment In Advance

A payment made which is before the point of any obligation.

Pension Liabilities

The cost, calculated by an Actuary, of providing the current members of a pension scheme with retirement benefits as set out in the pension scheme rules.

Pensions Costs

The benefits paid by the Council which are accrued during the period of employment and paid to ex-employees after retirement.

PFI

See Private Finance Initiative.

PFI Credits

The financial support provided to Local Authorities to part fund PFI capital projects.

Pooled Investment Funds Adjustment Account

This reserve contains the cumulative gains and losses related to pooled investment funds measured at FVPL as required by the statutory override effective for financial years 2018-19 to 2022-23.

Premium

A payment made in association with the early repayment of debt.

Pre-Payments

See payment in advance.

Present Value

See Discounted.

Previous Year Adjustments

These are material adjustments relating to prior year accounts that are reported in subsequent years and arise from changes in accounting policies or from the correction of fundamental errors.

Principal

The amount of repayment to a lender which relates to the reduction in the loan, rather than the interest paid on the loan.

Private Finance Initiative (PFI)

A Government initiative that enables, through the provision of financial support, Authorities to carry out capital projects through partnership with the private sector.

Projected Unit Method

This is a common actuarial funding method to value pension scheme liabilities.

Property, Plant And Equipment Assets (PPE)

Assets with a long Term value and physical substance such as buildings, land, IT equipment or vehicles.

Provisions

Potential costs that the Council may incur in the future because of something that happened in the past, which are likely or certain to be incurred and a reliable estimate can be made to the costs.

Prudent

A cautious approach to present the Financial Statements without significant risk of failure to achieve the assets presented.

Quoted Market Prices

A method of determining the fair value of financial assets via prices quoted on an active market.

Recognition

The process upon which assets are deemed to belong to the Council ether by purchase, construction or other form of acquisition.

Receivable

The Council's unconditional right to receive consideration in exchange for goods or services that it has transferred to a service recipient.

Residual

The remaining value in an asset at the end of a contract or lease.

Retirement Benefits

Remuneration package received by employees after their retirement from the Council.

Retrospectively

Changes made to previous years accounts to alter the treatment which has previously been reported.

Revaluation Gain

The increase to the fair value of an asset following a valuation.

Revaluation Reserve

This reserve contains revaluation gains on assets recognised since 1 April 2007 only, the date of its formal implementation.

Revenue

The cost associated with providing Council services.

Revenue Expenditure

Expenditure which is not capital.

Revenue Expenditure Funded From Capital Under Statute (REFCUS)
This is expenditure that is classified as capital although it does not result in the creation of a fixed asset.
Revenue Grant
Grant which is not capital.
Risk
The chance of an asset not coming to fruition or a liability being greater than anticipated.
Royal Institute Or Chartered Surveyors (RICS)
An international organisation who represent everything professional and ethical in land, property and construction.
Salaries And Wages
Payments made to employees in exchange for service worked at the Council.
Service Concession Arrangements
Arrangements which involve the supply and maintenance of assets and service delivery.
Service Costs
Reflects the element of annual payment for PFI or Leased assets which is in relation to services provided within the contract.
Service Expenditure Reporting Code of Practice (SERCOP)
CIPFA guidelines on reporting revenue expenditure.
Service Level Agreements
Contract of service.
Short Term
Less than 365 days from the balance sheet date.
Short Term Benefits
Employee benefits earned and consumed during employment.
Significant
A measure of materiality where the value is deemed to be almost all of the total value in question.
Soft Loans
Low interest rate loans.
Spot Yields
A calculation of the projected return on bonds if held to maturity.
Staff
See employee.
Statute
Set out in legislation.
Straight Line Basis
The method of calculation of depreciation to allocate an equal amount of depreciation each year over an asset’s useful life.
Support Services
Indirect costs of providing Council services including HR, Finance, Legal and Property Maintenance.

Surplus
Arises when income exceeds expenditure or when expenditure is less than available budget.
Surplus Assets
Assets which are no longer in operation.
Tangible
Physical, can be touched.
Tenant
The person or organisation that is occupying an asset under lease.
Termination Benefits
Employee benefits paid upon termination of employment such as redundancy.
The Code
CIPFA guidelines on accounting within Local Government.
Transactions
Individual items of income or expenditure.
Treasury Management
Utilisation of cash flows through investments and loans.
Unidentified Income
Income received by the Council where the reason for the income is unknown.
Unusable
Balances which are not available to support future spending.
Usable
Balances which are available to support future spending.
Useful Life
The period with which an asset is expected to be useful to the Council in its current state.
Value Added Tax
National taxation charged on goods and services.
Vesting
Obligation due which can be paid in cash.
Work In Progress
The fair value of incomplete contracts for goods and services which are to be charged to external customers.

Public

Statement of Accounting Policies

For the Year Commencing 1 April 2021

ACCOUNTING POLICIES

INTRODUCTION

The Accounting Policies for Derbyshire County Council (the Council) have been prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the Chartered Institute of Public Finance and Accountancy's (CIPFA) Code for Local Authority Accounting (the Code). Where there is no specific guidance in the Code, the Council has developed its own accounting policy which is aimed at creating information which is:

- Relevant to the decision-making needs of users; and
- Reliable, in that the financial statements:
  - Represent fairly the financial position, financial performance and cash flows of the entity;
  - Reflect the economic substance of transactions, other events and conditions and not merely the legal form;
  - Are neutral i.e. free from bias;
  - Are prudent; and
  - Are complete in all material respects.

This document outlines how the Council will account for all income, expenditure, assets and liabilities held and incurred during the 2021-22 financial year.

The accounting policies of the Council are updated annually to reflect any changes in IFRS, including changes in International Public Sector Accounting Standards (IPSAS), HM Treasury guidance, CIPFA guidance or any other change in statute, guidance or framework impacting on the authority's accounts.

The Accounting Policies of the Council as far as possible have been developed to ensure that the accounts of the Council are understandable, relevant, free from material error or misstatement, reliable and comparable. A Glossary of Terms can be found at the end of this document.

The document has been divided into four distinct categories which are Accounting Principles, Capital Accounting, Revenue Accounting and Treasury Management, with each policy being assigned a policy number.

ACCOUNTING PRINCIPLES

1.1. Going Concern

The Council prepares its accounts on the basis that it remains a going concern; that is that there is the assumption that the functions of the Council will continue in operational existence. In the case of a pending local government reorganisation, where assets and liabilities are due to be redistributed, the Council would still account on the basis of going concern as the provision of services would continue in another Council.

1.2. Accruals Concept

The Council accounts for income and expenditure in the period in which the provision of goods or service has taken place, rather than when cash payments are received or made.

Where income and expenditure has been recognised but cash has not been received or paid, a debtor or creditor for the relevant amount is recorded in the Balance Sheet. Equally, where cash has been received or paid which is not yet recognised as income or expenditure, a creditor (income in advance) or debtor (payment in advance) is recorded in the Balance Sheet.

1.3. Cost of Services

Internal support service costs (e.g. Human Resources) are apportioned across the core service areas to represent the total cost of delivering that service to the public, in accordance with the costing principles of the CIPFA Service Reporting Code of Practice 2021-22 (SerCOP).

Where possible the full cost of support services are shared between users in proportion to the benefits received, with the exception of:

- Corporate and Democratic Core – costs relating to the Council's status as a multi-functional, democratic organisation.
- Non-Distributed Costs – the cost of discretionary benefits awarded to employees retiring early and any depreciation and impairment losses chargeable on non-operational properties, or any other operational cost that cannot be reasonably attributed to a specific service.

1.4. Value Added Tax

Income and expenditure treated as either capital or revenue, excludes any amounts related to VAT. All VAT collected is payable to HM Revenue & Customs and all VAT paid is recoverable from the same. Any amounts outstanding (payment or receipt) at the year-end date is held as a creditor or debtor after netting off the amounts either due or owed.

1.5. Changes in Accounting Policy

Where there is a known future change in accounting policy required by the CIPFA Code, the Council will disclose the following in the notes to the accounts:

- The nature of the change in accounting policy;

- The reasons why applying the new accounting policy provides reliable and more relevant information;
- For both the current reporting period, and the previous year comparatives reported, the extent to which the change in accounting policy would have impacted on the financial statements if it had been adopted in that year;
- The amount of adjustment relating to years previous to those reported in the set of financial statements, had the proposed policy been adopted retrospectively;
- If retrospective application is impracticable for a particular period, the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.

The Council will also disclose information relating to an accounting standard which has been issued but not yet adopted.

1.6. **Prior Year Adjustments**

These typically arise from omissions and misstatements in the Council's financial statements for one or more prior periods. For the error to be a prior year adjustment, it would need to have arisen from a failure to use or misuse, reliable information that:

a) Was available when financial statements for those periods were authorised for issue; and
b) Could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements.

Such errors include the effects of mathematical mistakes, misunderstanding in applying accounting policies, oversights or misinterpretations of facts, and fraud.

They may also arise for reasons such as changes in Accounting Standards, which are required to be applied retrospectively.

Where required changes are thought to be significant, an adjustment will be entered into the financial statement's comparative year balances, and the columns headed 'restated'. In addition, full disclosure as to the nature, circumstance and value of the adjustment will be disclosed in the notes to the accounts.

Errors which are found and are not significant will not result in a prior year adjustment and will be corrected as a current year entry. In addition, errors as a result of information which was not known to the Council or could not have reasonably been obtained by the Council when the accounts were authorised for issue will also be treated as an in-year adjustment.

1.7. **Unidentified Income**

All unidentified income received is initially coded to an income suspense account. Individual amounts below £10 are written off due to immateriality. Weekly updates of the content of the suspense accounts are circulated to finance departments, to ensure the balances are cleared quickly. Any items of income below £10,000 which remain unidentified for six months will be written off. Items above £10,000 will be written off after 12 months.

1.8. Events after the Balance Sheet Date

Where there is a material post balance sheet event before the date the accounts are authorised for issue, a disclosure in the notes to the accounts will be included. If this event provides additional evidence of conditions that existed at the Balance Sheet date, and materially affects the amounts to be included in the accounts; adjusting items will be shown in the accounts.

1.9. Exceptional Items

Exceptional items will have been disclosed separately on the face of the Comprehensive Income and Expenditure Statement and details will be disclosed in the notes to the accounts.

1.10. Contingent Assets and Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required, or the amount of the obligation cannot be measured reliably. They are not recognised in the Balance Sheet but disclosed in a note to the accounts.

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

CAPITAL ACCOUNTING

1.11. Recognition of Capital Expenditure (de-minimis Policy)

In accordance with International Accounting Standard 16 (IAS 16), the Council recognises non-current assets as:

- Assets where it is expected that future economic benefit or service potential will flow to the Council.
- Assets where the cost can be measured reliably.

and defines them as:-

- Assets held for use in the production or supply of goods or services, rental to others, or for administrative purposes.
- Assets expected to be used for more than one financial period.

The initial measurement of an asset is recognised to be:

- Purchase price, construction cost, minimum lease payments or equivalent including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates.

- Costs associated with bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management.
- Initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located, the obligation for which the Council incurred either when the asset was acquired or as a consequence of having used the asset during a particular period for purposes other than producing inventories during that period.

Subsequent expenditure are costs incurred to add to, replace part of, or service the asset, but do not include day-to-day repairs and maintenance and are treated as capital when

- The expenditure will substantially increase the market value of the asset.
- The expenditure will substantially increase the extent to which the Council can use the asset for the purpose, or in conjunction with the functions of the Council.

Where a component is replaced, the carrying amount of the old component shall be derecognised to avoid double counting and the new component reflected in the carrying amount, subject to the recognition principles as set out above.

The Council has two levels of de-minimis for recognition of capital expenditure, £10,000 and £500,000:

- £10,000 and below – all expenditure at this level is deemed to be non-enhancing unless funded by a Capital grant, and therefore is charged to revenue as it is incurred. This includes initial recognition of assets and subsequent asset expenditure.
- Above £500,000 - expenditure meeting the definitions above will be treated as capital expenditure, either as initial recognition or as an enhancement. However, in order to ensure that the subsequent asset expenditure is enhancing the value of the asset, the Council will instruct a valuation of the asset by a Royal Institute of Chartered Surveyors (RICS) qualified valuer, and any impairment or additional enhancement recognised as necessary.
- Any expenditure above £10,000 and below £500,000 will be treated as capital expenditure as the amount is significant enough to increase the useful life of an asset, however is not material enough to warrant individual impairment review, until the time the asset would normally be valued.

Capital Assets are held on the balance sheet as non-current assets, unless otherwise stated.

The Council has assessed whether Voluntary Aided, Voluntary Controlled and Foundation Schools should be included within the balance sheet, based upon an assessment of ownership and control of the assets. Maintained schools are already held on the balance sheet as the Council controls these entities and therefore all transactions relating to maintained schools are recognised in these accounts. Other types of schools such as Voluntary Aided, Voluntary Controlled and Foundation schools are subject to a test of ownership. The Council recognises a school's assets on its balance sheet where it directly owns them and/or the Council retains substantive rights over the assets and the future economic benefits/service potential of school assets flow to the Council or rights to use the assets have been transferred from another entity.

1.12. **Donated Assets**

These are acquired at less than fair value or transferred for nil consideration. When the Council receives a donated non-current asset, the initial recognition of the asset will be at fair value.

Once any condition attached to the donation has been satisfied, the credit which is the difference between any cash payment and fair value will be treated as income in the Taxation and Non-Specific Grant Income and Expenditure line in the Comprehensive Income and Expenditure Statement. To ensure there is no impact on Council Tax this will then be reversed in the Movement in Reserves Statement and credited to the Capital Adjustment Account.

Until the condition has been satisfied the credit will be recognised in the Donated Assets account. If there is no condition, the recognition of the credit in the Comprehensive Income and Expenditure Statement will occur upon acquisition of the asset.

The fair value of an asset will be assessed upon acquisition; this will be provided by a RICS qualified valuer for property assets and another relevant valuation specialist for other types of asset. After initial recognition, donated assets are treated in the same way as similar owned assets.

1.13. **Non-Current Asset Classification**

The Council manages its assets in the following categories:

- **Intangible Assets**

  In line with International Accounting Standard 38 (IAS 38), the Council recognises intangible assets as non-monetary assets without physical substance, where that asset meets the capital expenditure criteria set out in Accounting Policy 1.11.

- **Property, Plant and Equipment Assets**

  Property Plant and Equipment Assets are subcategorised into Operational Land & Buildings, Community Assets, Vehicles Plant Furniture & Equipment, Infrastructure Assets, Non-Operational Assets, these being Surplus Assets and Assets under Construction.

  - Land and/or Buildings Assets.

    These assets are recorded, valued and accounted for based on their significant components in line with IAS 16. The Council recognises a significant asset to be 25% of the total asset base within an asset class. A component would be recognised if its expenditure in a given financial year exceeds 25% of the total value of the significant asset and has a substantially different life to the overall asset:

- Combined Group containing Flat Roof & Mechanical Engineering (Internal Works i.e. boiler system)
- Land
- Temporary Buildings (sheds / portacabins)
- Combined group containing permanent structure, external works (i.e. car park), pitched roof and components of less than 25% of the overall structure value
- Other unique features (e.g. a swimming pool)

- Community Assets
  These are assets that the Authority intends to hold in perpetuity, that have no determinable useful life and which may, in addition, have restrictions on their disposal. There is little prospect for sale or change of use.

  If the asset is used for a specific operational purpose, it does not qualify as a community asset and should be valued accordingly.

- Infrastructure Assets
  These include all tangible (physical) assets required within the Council's road networks. There is no prospect for sale or alternative use of infrastructure assets; expenditure is only recoverable through continued use of the asset.

- Vehicles, Plant Furniture and Equipment Assets and Assets Under Construction
  These assets are also classified as Property Plant and Equipment where they do not meet the criteria for Investment Property Assets or Assets Held for Sale.

- Non-Operational (Surplus) Assets
  Surplus assets are assets that are not being used to deliver services, and do not meet the criteria to be classified as either investment properties or held for sale. All surplus assets under IFRS13 which came into effect and were adopted by the Council from 1 April 2015 are to be valued at Fair Value and depreciated accordingly.

- **Investment Property Assets**
  These are items of land and / or buildings held by the Council solely for the purpose of rental income generation or capital appreciation or both.

  As such where there is a service of the Council being delivered from the property, this is not classified as Investment Property Assets. This includes where the intention of the asset is to generate economic growth to an area such as below market value rental.

Investment property that subsequently meets the criteria within the Code to be classified as held for sale shall continue to be accounted for as an investment property but may be reported separately as investment property held for sale.

Some Assets Under Construction may also be classified as Investment Properties where the intended eventual use is rental income generation or capital appreciation.

- **Heritage Assets**

  Assets that are intended to be preserved in trust for future generations because of their cultural, environmental or historical associations are classified as Heritage Assets.

- **Assets Held for Sale**

  The Council will classify assets as held for sale where all of the following criteria have been met:
  - The asset must be available for immediate sale in its present condition. However, if a sale is dependent on planning permission being obtained, reclassification is suspended until that permission has been given.
  - The asset's sale is highly probable.
  - The asset must be actively marketed for sale.
  - The completion of the sale is expected within 12 months from the date of classification.

In situations where it is not necessary to carry out active marketing, for example the Council is able to identify prospective purchases willing to pay a reasonable price without marketing or because the buyer initiates the transaction (such as a right-to-buy-sale) the actively marketed test is treated as 'not applicable', rather than failed.

Assets which become non-operational which do not meet all of the criteria set out as assets Held for Sale will be classified as surplus. If at a later point in time the asset no longer meets the criteria of Held for Sale, it is restored to its previous classification and all transactions which would have occurred shall be retrospectively applied as though the asset had never been held for sale.

Assets meeting the criteria as Held for Sale are held as current assets on the balance sheet as income is expected within 12 months.

It is possible that assets meeting the criteria to be Held for Sale; may undergo a change in circumstance beyond the control of the Council resulting in the sale being delayed beyond 12 months. In these instances, the Council follows the policies outlined for assets held for sale; however, disclosure of the value for these assets is within non-current assets. Due to the circumstances around the definition, it is expected that this will occur very rarely.

1.14. **Non-Current Asset Valuation Methodology**

The various classifications of assets as outlined in Accounting Policy 1.13 are valued on a differing base. Where not explicitly stated otherwise, property revaluations are completed by a RICS qualified valuer (who is internal to the Council), over a 'short period', interpreted to mean on a five year rolling programme for each class of asset i.e. 20% of the Council's assets are revalued at 31 March for the financial year.

Where there is an upward revaluation, the carrying value is increased and the associated credit charged directly to the Revaluation Reserve. This is then reflected in the Comprehensive Income and Expenditure Statement as a revaluation gain. Where there is a revaluation resulting in a lower than carrying amount valuation, this is treated in line with Accounting Policy 1.15 – impairment of Non-Current Assets.

The Council, as per the reporting standard, values its assets and liabilities in accordance with section 2.10 of the Code of Practice on Local Authority Accounting in the United Kingdom to reflect the adoption of IFRS13 Fair Value Measurement at each reporting date except where adaptations to fit the public sector are detailed in the Code. However, Section 4.1 of the Code adapts IAS 16 to require that items of Property, Plant and Equipment that are operational and therefore providing a service potential for the authority are measured for their service potential at existing use value, existing use value – social housing, (depreciated) historic cost or depreciated replacement cost and not at fair value. Surplus assets are measured at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants and the measurement date. The fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability
- In the absence of a principal market, in the most advantageous market for the asset or liability.

Fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

When measuring the fair value of a non-financial asset, the Council takes into account a market participants ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Code requires all assets to be measured at Current Value and the basis of valuation will be determined using the following criteria:

- Depreciated replacement cost – specialised assets
- Existing use value – non-specialised assets
- Existing use value – social housing

Fair value for the following assets:

- Investment assets
- Surplus assets
- Assets Held for Sale (less costs to sell)

The Council uses valuation techniques, as required by the Code, which maximise the use of relevant observable inputs and minimise the use of unobservable inputs and that are appropriate in the circumstances and for which sufficient data is available.

Observable inputs are inputs that are developed using market data, such as publicly available information about actual events or transactions, and that reflect the assumptions that market participants would use when pricing the asset or liability.

Unobservable inputs are inputs for which market data is not available and that are developed using the best information available about the assumptions that market participants would use when pricing the asset or liability.

The Council follows the fair value hierarchy which categorises inputs to the valuation techniques in respect of assets and liabilities into three levels for which fair value is measured or disclosed in the Council's financial statements, these include:

- Level 1 inputs – unadjusted quoted prices in active markets for identical assets or liabilities
- Level 2 inputs – inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly
- Level 3 inputs – unobservable inputs for the asset or liability

Highest priority is given to Level 1 inputs (unadjusted) in active markets and lowest priority to Level 3.

Upon the revaluation of a Surplus Asset at the 31st March of the financial year, based on the inputs available at the date of valuation the valuer will establish the Code Valuation Input Level for the valuation and will compare this with the Code Valuation Input Level for the previous valuation. Where the Input Level is different from that of the previous valuation this will be specifically reported with the valuation together with a narrative description of the reasons and differing circumstances that have resulted in the change.

Valuations are completed under the Code as follows:

➢ **Intangible Assets –** the Council recognises Intangible Assets at cost. The Council will only revalue intangible assets annually where there is a determinable market value for the asset.

- **Property Plant and Equipment (PPE) –** Property Assets are held at current value which is the amount that would be paid for the asset in its existing use. This requirement is met by providing a valuation on the basis of Existing Use Value (EUV) in accordance with United Kingdom Practice Statement (UKPS) 1.3 of the RICS Valuation Standards. Where no other valuation method can be used because of the specialist nature of the asset, current value is estimated using a Depreciated Replacement Cost (DRC) approach. Vehicles, Plant, Furniture and Equipment, IT Hardware, and Assets Under Construction within PPE are held at historic cost (not valued).

- **Infrastructure Assets –** the Council recognises Infrastructure Assets at Depreciated Historical Cost.

- **Investment Property Assets –** Investment Properties are annually revalued at fair value which is interpreted as the amount that would be paid for the asset in its highest and best use, i.e. market value. An investment property under construction is measured at cost until such time as its fair value can be determined reliably or its construction us complete, whichever comes first. The fair value of Investment Property held under a lease is the lease interest.

- **Community Assets –** the Council recognises Community Assets at historic cost.

- **Heritage Assets –** where it is possible to determine a valuation for Heritage Assets, then the Council will recognise the asset in the Balance Sheet at that valuation. Where a valuation has been applied to this class of assets, other than a historic valuation, a range of valuation bases have been used which include external valuations, curatorial valuations and a limited number of cases of insurance valuations. Where a curatorial valuation has been applied the valuation is dependent upon the experience and knowledge of the Derbyshire Museums Manager. However, where it is not practicable to obtain a valuation the asset will be carried at historic cost. Where information on cost or value is not available all Heritage Assets will be disclosed in the notes to the accounts, even where they are not recognised in the Balance Sheet. Where there is evidence of impairment to Heritage Assets e.g. where an item has suffered a physical deterioration or breakage or new doubts arise as to its authenticity, any impairment is recognised and measured in accordance with the Council's general policies on impairment.

- **Assets Held for Sale –** Assets held for sale are, at initial classification and at the end of each reporting year, valued at the lower of carrying amount and fair value less costs to sell and depreciation on these assets should cease.

- **Surplus Assets** - Surplus assets are valued at Fair Value in accordance with the Code.

1.15. **Impairment of Non-Current Assets**

This accounting policy has been created in accordance with IAS 36.
Impairment is the amount to which the carrying value of an asset exceeds the recoverable amount.

At the end of each reporting period the Council assesses whether there is any indication that an asset may be impaired.

The Council recognises impairment as:

- A significant decline (i.e. more than expected as a result of the passage of time or normal use) in an asset's carrying amount during the period that is specific to the asset;
- Evidence of obsolescence or physical damage of an asset;
- A commitment by the Council to undertake a significant reorganisation; and
- A significant adverse change in the statutory or other regulatory environment in which the Council operates.

Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains). Any further impairment or if there has been no previous revaluation, the impairment is charged to revenue. This is then reversed through the Movement in Reserves Statement and charged to the Capital Adjustment Account.

1.16. **Disposal of Non-Current Assets**

When an asset is disposed of or decommissioned, the value of the asset in the Balance Sheet is written off to the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Receipts from disposals are credited to the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Any revaluation gains in the Revaluation Reserve are transferred to the Capital Adjustment Account.

Sale proceeds in excess of £10,000 are categorised as Capital Receipts. Receipts are credited to the Capital Receipts Reserve, and can then only be used for new capital investment or set aside to reduce the Council's underlying need to borrow (the Capital Financing Requirement). Receipts are transferred to the Reserve from the movement in reserves statement. The value of the asset is transferred to the Capital Adjustment Account via the Movement in Reserves Statement.
Sale proceeds of £10,000 and below are credited straight to the Comprehensive Income and Expenditure Statement.

1.17. **Depreciation / Amortisation Methodology**

In order to recognise the total cost of using fixed assets, the Council has a policy to depreciate assets on a straight line basis over their useful economic life, reducing the value of the asset, and charging the relevant revenue service expenditure. However, under statute, depreciation is not chargeable to the taxpayer, the Council removes this charge through the Movement in Reserves Statement and charges it to the Capital Adjustment Account.

The Council charges depreciation on a pro-rata basis during the year i.e. from the month of acquisition to the month of disposal.

The economic lives of assets are:

- **Intangible Assets –** 5 years.

- **Property Plant and Equipment**
    - Combined Group for Flat Roof and Mechanical Engineering – 20 years
    - Land – not depreciated
    - Temporary Buildings – 15 years
    - Modular Buildings – 25 years
    - Combined group for structure, external works, pitched roof and components of less than 25% of the overall structure value – 40 years
    - Other unique features (i.e. a swimming pool) – as required
    - Fixtures and Fittings – 10 years
    - IT Hardware – 5 years
    - Vehicles – 3 to 10 years

- **Infrastructure Assets**
    - Carriage ways – 40 years
    - Footways and cycle tracks – 40 years
    - Structures – 40 years
    - Lighting – 25 years
    - Traffic management – 25 years
    - Street furniture – 25 years

- **Investment Property Assets –** not depreciated

- **Community Assets –** Community Assets are assets that an authority intends to hold to perpetuity which have no determinable useful lives and as such are not depreciated.

- **Assets Held for Sale –** are not depreciated

1.18. **Leases**

In line with IAS 17, the Council recognises a lease to be any agreement which transfers the right to use an asset for an agreed period in exchange for payment, or a series of payments.

This includes leases, hire purchase, rental, contracts of service, service level agreements and any other arrangement where the ability to use an asset is conveyed.

1.19. **Defining a Finance Lease**

A finance lease is where substantially all of the risks and rewards relating to ownership transfer to the lessee.

Tests to give an indication of the transfer of risk and reward are:

- If the lessee will gain ownership of the asset at the end of the lease term (e.g. hire purchase)
- If the lessee has an option to purchase the asset at a sufficiently favourable price that it is reasonably certain, at the inception of the lease, that it will be exercised
- If the lease term is for the major part of the economic life of the asset even if the title is not transferred. Measures to identify this are:
    - The economic life of the asset is deemed to be that which is consistent with the class of asset in the depreciation policy.
    - The Council recognises 'major part' to be 75% of the life of the asset, unless on an individual case basis this would not give a true representation of the substance of the transaction.
- At the inception of the lease, the present value of the minimum lease payments amounts to at least substantially all of the fair value of the leased asset. Measures to identify this are:
    - Fair value of the leased asset is assessed by a RICS qualified valuer.
    - The present value of the minimum lease payments is calculated by discounting at the rate inherent in the lease.
    - If this rate cannot be determined the incremental borrowing rate applicable for that year is used.
    - The Council recognises 'substantially all' to be 75% of the value of the asset, unless on an individual case basis this would not give a true representation of the substance of the transaction.
- The leased assets are of such a specialised nature that only the lessee can use them without major modifications.
- If the lessee cancels the lease, the losses of the lessor, associated with the cancellation are borne by the lessee.
- Gains or losses from the fluctuation in the fair value of the residual accrue to the lessee (e.g. in the form of a rent rebate equalling most of the sales proceeds at the end of the lease).
- The lessee has the ability to continue the lease for a secondary period at a rent that is substantially lower than market rent.

A suitably experienced accountant, with assistance from qualified valuers, will make a judgement based on the level of risk and reward held by the Council as to whether a lease is operating or finance.

1.20. **Defining an Operating Lease**

The Council recognises an operating lease to be a lease which is not a finance lease.

1.21. Lessee Accounting for a Finance Lease

Where the Council is tenant in a property, or is, by definition of IFRIC 4, leasing an asset which is deemed under IAS 17 to be a finance lease the Council will recognise that asset within the asset register, and account for that asset as though it were an owned asset.

The initial recognition of the asset is at the fair value of the property, or if lower, the present value of the minimum lease payments. A liability is also recognised at this value, which is reduced as lease payments are made.

1.22. Lessor Accounting for a Finance Lease

Where the Council is the lessor for a finance lease, the asset is not recognised in the asset register; however, a long-term debtor at the present value of minimum lease payments is recognised. Income received is split between capital - credited against the debtor, and finance income – credited to the Comprehensive Income and Expenditure Statement as interest receivable.

1.23. Lessor Accounting for an Operating Lease

Where the Council is the lessor for an operating lease, it will retain the property as either an item of Property Plant and Equipment or as an Investment Property on the Balance Sheet. Any rental income is credited to the relevant service income.

1.24. Service Concession Agreements (Private Finance Initiative (PFI) and other similar contracts)

PFI contracts are agreements to receive services, where the responsibility for making available the fixed assets needed to provide the services passes to the PFI contractor. PFI and similar contracts are assessed against criteria within IFRIC 12 Service Concession Arrangements to determine whether the risks and rewards incidental to ownership lie with the Council or the contractor.

Those which lie with the contractor – payments made during the life of the contract are chargeable to revenue as incurred.

Those which lie with the Council – are recognised as an asset in the Balance Sheet for the construction costs of the asset. Once recognised this asset is treated in line with all capital assets. A corresponding long-term liability is also recognised at the construction value. Payments made during the life of the contract are split into finance costs, capital costs and service costs. Determining the split of payments is calculated at the inception of the contract and is based on the inherent interest rate within the original agreement. Finance costs are chargeable to the Comprehensive Income and Expenditure Statement as Interest payable. Capital Costs reduce the level of liability in the Balance Sheet. Service costs are chargeable to the relevant revenue service expenditure. Pre-payments or Dowry payments reduce the level of liability at the start of the contract.

PFI Credits are treated as general revenue government grants.

1.25. **Capital Grants and Contributions**

The Council recognises capital grants and contributions as being related to capital assets and uses them to fund capital expenditure on those assets. Grants, contributions and donations are recognised as income at the date that the Council has satisfied the conditions of entitlement, and there is reasonable assurance that the monies will be received.

Any grant received before these recognition criteria were satisfied would be held as a creditor. Any grant which had met the recognition criteria but had not been received would be shown as a debtor. This is in line with the Accruals Concept Policy.

Once the recognition criteria above have been satisfied, capital grants are recognised as income in the Comprehensive Income and Expenditure Statement.

In order to not impact on the level of Council Tax, the Council removes the credit from the General Reserves through the Movement in Reserves Statement and makes a credit to the Capital Grants Unapplied Reserve.

Once expenditure has been incurred on the related asset, the credit is removed from the Capital Grants Unapplied Reserve and credited to the Capital Adjustment Account.

1.26. **Revenue Expenditure Funded from Capital Under Statute (REFCUS)**

Expenditure incurred that either may be capitalised under statutory provisions or is capital in nature but does not result in the creation of a fixed asset that is owned by the Council. REFCUS is charged as expenditure to the Comprehensive Income and Expenditure Statement in the year, however, is financed from existing capital resources or by borrowing. A transfer between the Capital Adjustment Account and the Movement in Reserves Statement then reverses out the impact on the general fund balance.

1.27. **Minimum Revenue Provision (MRP)**

The Council is not required to raise Council Tax to cover depreciation, impairment losses or amortisations. However, it is required to make an annual provision from revenue to contribute towards the reduction in its overall borrowing requirement.

The Council will provide for 2.5% of debt outstanding on all debt as at 31 March 2008. On any new debt since this date the Council will provide 2.5% of the balance on all borrowing, unless any unsupported borrowing relates to any significant assets with a life of less than 20 years. In this case an annual amount based on the expected useful life of the individual assets is used and where those assets are vehicles then an average life of five years is used.

The Council has adopted the policy of charging MRP for PFI and Leased Assets at the value of the associated loan liability repayment each year, thus mitigating the impact to the General Reserve.

1.28. **Capital Reserves**

The Council holds Capital Reserves for the purpose of financing capital expenditure. Reserves will be disclosed as either usable (available to fund capital expenditure) or unusable (reserves held as a result of timing differences associated with recognition of capital expenditure and related financing).

Movements in capital reserves are accounted through the Movement in Reserves Statement.

REVENUE ACCOUNTING

1.29. **Recognition of Revenue Expenditure**

The Council recognises revenue expenditure as expenditure which is not capital.

1.30. **Employee Costs**

In accordance with IAS 19, the Council accounts for the total benefit earned by employees during the financial year.

Employee Costs are split into 3 categories; short term benefits, termination benefits and pensions costs.

Short Term Employee Benefits

- **Salaries and Wages –** The total salary and wages earned by employees during the financial year are charged to the Comprehensive Income and Expenditure Statement. Where the amount accrued exceeds the amount paid at the 31 March, a creditor will be reflected in the accounts.

- **Leave Owed, Accumulating Absences –** The Council allows employees to earn time off in one period with the resulting cost to the Council in a later period when that time is either taken off or paid to the employee. Examples of this accumulating leave are annual leave, flexi-time and time off in lieu.

  If an employee were to leave the Council, cash payment would be made for entitlements such as annual leave; this leave is termed vesting. Where no cash payment would be due, the leave is termed non-vesting.

  In order to correctly reflect the cost of time owed to staff, a charge has been made to the Comprehensive Income and Expenditure Statement and a creditor accrual has been reflected in the Balance Sheet. This charge is reflective of the estimated time cost value of all accumulating leave owed to employees. Vesting leave will be charged in full; however non-vesting leave has been adjusted to reflect the turnover of staff.

- **Easter Bank Holiday –** When Good Friday and/or Easter Monday fall in April, the preceding financial year only accounts for 6 or 7 bank holidays rather than the statutory 8. When this occurs, a charge is made to the Comprehensive

Income and Expenditure Statement and a creditor accrual is reflected in the Balance Sheet.

- **Non-accumulating Absences –** are periods of leave that cannot be carried forward for use in future periods. Examples include Maternity Leave, Special Leave, Sick Leave and Jury Service. The Council does not recognise non-accumulating compensated absences until the time that the absence occurs.

- **Non-monetary Benefits –** Where employees have non-monetary benefits (e.g. retirement benefits or life insurance), the associated cost of providing that benefit has been charged to the Comprehensive Income and Expenditure Statement.

Termination Benefits

- **Redundancy Costs –** The obligation to pay redundancy costs occurs when there is a formal plan to create redundancies. The plan would include the location, function and approximate number of employees affected; the termination benefits offered; and the time of implementation. When these recognition criteria have been met the Council recognises the costs associated with this in the service revenue expenditure and creates a creditor in the Balance Sheet. Where the payable amount is due in more than 12 months from the year end date, the costs are discounted at the rate determined by reference to market yields. In the case of an offer to encourage voluntary redundancy, the Council has recognised the estimated cost based on the expected number of employees taking the offer.

The Council will disclose details of exit packages within the notes to the accounts.

Pensions Costs

- **Teachers' Pension Scheme –** is a defined benefit scheme administered by the Department for Education. The assets and liabilities of the Teachers' Pension Scheme are not attributable to the Council, therefore the Council accounts for the scheme as if it were a defined contribution scheme. This means that the Children and Education Services line in the Comprehensive Income and Expenditure Statement will only include the Council's contributions payable to the scheme.

- **Local Government Pension Scheme –** is a defined benefit scheme. The liabilities of the scheme attributable to the Council are included in the Balance Sheet on an actuarial basis using the projected unit method – i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date by employees, based on assumptions such as mortality rates and employee turnover rates, and projections of earnings for current employees.

  Pension liabilities are measured using the projected unit method, discounted using the rate on high quality corporate bonds of equivalent term to the liabilities. The discount rate is the weighted average of "spot yields" on AA rated corporate bonds.

The change in the net pension liability is analysed into seven components:

- Current Service Cost – the increase in liabilities as a result of years of service earned this year – allocated in the Comprehensive Income and Expenditure Statement within the relevant service area dependant on staff employed at the Council. The current service cost includes an allowance for administration expenses
- Past Service Cost – the increase in liabilities arising from current year decisions whose effect relates to years of service earned in earlier years – debited to the Comprehensive Income and Expenditure Statement as part of Non-Distributed Costs
- Gains/Losses on Settlements and Curtailments – the result of actions to relieve the Council of liabilities or events that reduce the expected future service or accrual of benefits of employees – debited to the Net Cost of Services in the Comprehensive Income and Expenditure Statement as part of Non Distributed Costs
- Interest Cost – the expected increase in the present value of liabilities during the year as they move one year closer to being paid – debited to Net Operating Expenditure in the Comprehensive Income and Expenditure Statement
- Interest Income on Plan Assets – the annual investment return on the fund assets attributable to the Council, based on an average of the expected long-term return – credited to Net Operating Expenditure in the Comprehensive Income and Expenditure Statement
- Actuarial Gains and Losses – changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation or because the actuaries have updated their assumptions – debited to the Movement in Reserves Statement.
- Employer Contributions – cash paid by the Council to the Pension Fund.

In relation to retirement benefits, statutory provisions require the General Reserve to be charged with the amount payable by the Council to the Pension Fund in the year, not the amount calculated according to the relevant accounting standards. Adjustments are therefore made in the Movement in Reserves Statement.

➢ **Early Retirement, Discretionary Payments –** the Council has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff (including teachers) are accrued in the year of the decision to make the award and accounted for using the same policies which are applied to the Local Government Pension Scheme.

1.31. **Lessee Accounting for an Operating Lease**

Costs associated with operating leased assets where the Council is the lessee are charged immediately to the Comprehensive Income and Expenditure Statement within the Net Cost of Services on an accruals basis.

1.32. **Revenue Grants and Contributions**

Grants, contributions and donations (referred to as grants for the purposes of this policy) are recognised as income at the date that the Council has satisfied the conditions of entitlement, and there is reasonable assurance that the monies will be received. Any grant received before these recognition criteria were satisfied would be held as a creditor (income in advance). Any grant which had met the recognition criteria but had not been received would be shown as a debtor.

Revenue grants will either be received to be used only for a specific purpose or can be used for general purpose. Those for a specific purpose are recognised in the Comprehensive Income and Expenditure Statement within the Net Cost of Services. Those which are for general purpose are shown within Other Operating (Income) and Expenditure in the Comprehensive Expenditure and Income Statement.

1.33. **Income from Service Recipients**

Income from service recipients is defined as consideration that a party, which has contracted with the Council, has given in exchange for goods or services that are the output of the Council's normal operating activities. Such a contract may be in writing, orally or in accordance with customary business practices. These may include:

- Charges for service provided by the Council.
- Sale of goods provided by the Council.
- Fees and charges for services under statutory requirements where there is an exchange of assets or services, such as the issuing of a licence or processing of an application.

In such cases the Council recognises income when it has satisfied the performance obligation by transferring the promised goods or services to the service recipient. The point of transfer is when the service recipient takes control of the goods or benefits from the service.

The Council deems performance obligations to be satisfied over time, rather than at a point in time if any of the following criteria are met:

- The service recipient simultaneously receives and consumes the benefits of a service.
- The Council's performance enhances an asset that the service recipient controls.
- The Council has an enforceable right to payment for performance completed to date and that performance does not create an asset for which it has an alternative use.

Such income is recognised in the Comprehensive Income and Expenditure Statement within the Net Cost of Services.

1.34. **Provisions**

Provisions are made where an event has taken place that gives the Council an obligation that probably requires settlement by a transfer of economic benefits, but where the timing of the transfer is uncertain.
Provisions are charged to the appropriate service revenue account in the year that the Council recognises an obligation, based on the best estimate of the likely settlement. When payments are eventually made, it is charged to the provision. Where payment is not expected for more than 365 days after the balance sheet date, the provision has been discounted using the rate of a high quality corporate bond.

Estimated settlements are reviewed at the end of each financial year and adjustments with the Comprehensive Income and Expenditure Statement are made as required.

Where some or all of the payment required to settle a provision is expected to be met by another party (e.g. from an insurance claim), this is only recognised as income if it is virtually certain that reimbursement will be received if the obligation is settled.

The Council does not hold any general provisions.

1.35. **Revenue Reserves**

The Council holds usable revenue reserves for the purpose of funding future expenditure. The General Reserve represents the balance of reserves to meet short term, unforeseeable expenditure and to enable significant changes in resources or expenditure to be properly managed over the period of the Five Year Financial Plan. Earmarked Reserves represent balances where approval has been received to use the reserve for a specific purpose.

Unusable revenue reserves represent timing differences such as those associated with the recognition of retirement benefits, Council tax income and financial instruments.

Movement in reserves are accounted through the Movement in Reserves Statement.

The Council publishes a separate Reserves Policy document, which is reviewed by Cabinet at least annually.

1.36. **Research Costs**

Research costs should be treated as revenue expenditure at the point in which they are incurred and charged to the Comprehensive Income and Expenditure Statement.

1.37. **Members' Allowances**

The Council in exercise of the powers and duties conferred by the Local Authorities (Members' Allowances) (England) Regulations 2003, has established a Members Allowance Scheme, outlining the allowances payable to Members of the Council.
Members are reminded of the need to keep detailed supporting information, such as a diary, about every attendance for which they claim. This information should be

available for scrutiny by the Council's Auditors or other relevant persons as and when required. The scheme is updated annually, and full details are available on the Council's website.

The total amount paid in terms of Members Allowances is disclosed in the notes to the accounts.

1.38. Council Tax and Business Rates Recognition

Council Tax and Business Rates income included in the Comprehensive Income and Expenditure Statement includes the Council's share of accrued income recognised by billing authorities in the production of the Collection Fund Statements.

The difference between the income included in the Comprehensive Income and Expenditure Statement and the amount required by regulation to be credited to the General Reserve is taken to the Collection Fund Adjustment Account and reported in the Movement in Reserves Statement.

1.39. Inventories and Work in Progress

Inventories are included in the Balance Sheet at the lower of cost and net realisable value. Inventory is recorded in terms of average cost, with the exception of fleet parts where the cost is recorded on a first in, first out basis.

Work in progress is subject to an interim valuation at the year-end and recorded in the Balance Sheet at cost plus any profit reasonably attributable to the works.

1.40. Loss Allowance for Expected Credit Losses

The Council maintains a loss allowance for any amounts it is due to receive from its debtors or investments which might become uncollectable.

Credit risk is assessed based on the expectation of a debtor's or an investment issuer's ability to pay future cash flows due under the contractual terms. This risk is estimated, where possible, based on historical loss experience, the debtor's or investment issuer's credit rating and other impacting factors including forward-looking information.

The loss allowance for an investment is initially measured at an amount equal to the portion of the lifetime credit losses which might be expected from a default event within 12 months of the balance sheet date. If the Council considers that the risk of default on an investment has increased significantly since the investment was initially recognised it will measure the loss allowance at an amount equal to the total lifetime credit losses expected from a default event.

At each Balance Sheet date, the Council makes a two-stage assessment of significant increases in credit risk since initial recognition:

- Firstly, whether there is evidence of a significant increase for an individual debtor or investment that is significant, and

- Secondly, whether there is evidence of a significant increase for groups of similar debtors or investments.

The Council adopts the simplified approach of measuring the loss allowance for debtors at an amount equal to the total lifetime credit losses expected from a default event, from the time a debtor is initially recognised.

No loss allowance is recognised for expected credit losses where the debtor or investment issuer is central government or another local authority for which relevant statutory provisions prevent default.

Loss allowances are offset against the debtor or investment amount shown as an asset. The movement in the allowance is charged to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

TREASURY MANAGEMENT

1.41. **Definition of Treasury Management Activities**

The Council has adopted the following definition of Treasury Management activities:

The management of the Council's cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.

The Council regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the Council.

The Council acknowledges that effective treasury management will provide support towards the achievement of its service objectives. It is therefore committed to the principles of achieving best value in treasury management, and to employing suitable performance measurement techniques, within the context of effective risk management.

1.42. **Cash and Cash Equivalents**

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours. Cash equivalents are highly liquid investments that mature in no more than three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in the value.

1.43. **Financial Liabilities**

Financial liabilities are initially measured at fair value and carried at their amortised cost.

Annual charges to the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument. For most of the borrowings that the Council has, this means that the amount presented in the Balance Sheet is the outstanding principal repayable plus any interest accrued to 31 March and interest charged to the Comprehensive Income and Expenditure Statement is the amount payable for the year in the loan agreement.

Any premiums or discounts, incurred on the early repayment of loan debt, arising from 1 April 2007 are taken immediately to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement in the year of repayment. However, the amount is then credited or debited to the General Reserve and transferred to the Financial Instruments Adjustment Account via the Movement in Reserves Statement as required by statute.

The regulations allow that the premium or discount is amortised over periods specified in the statutory guidance. In accordance with the guidance the Council has a policy of spreading the premium or discount over the remaining term of the original loan, or a minimum of 10 years in the case of discounts. This amortisation is managed by a transfer from the Financial Instruments Adjustment Account to the General Reserve via the Movement in Reserves Statement.

Where a loan has been restructured, by a modification to the terms of the existing loan or by an exchange of debt instruments with the existing lender, and the terms are substantially different, the original financial liability is extinguished and a new financial liability is recognised. The difference between the carrying amount of the new and extinguished liability and any consideration transferred is recognised in Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

Where the terms of a loan debt exchange or the modification to the terms of an existing loan are not substantial, the carrying amount of the liability is adjusted to the value of the remaining cash flows required by the new terms, including any premiums or discounts paid/received, discounted to present value at the original loan’s effective interest rate. Any gain or loss on modification is credited and debited to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

A modification of terms is deemed to be substantially different if the present value of the cash flows under the new terms, including any premiums or discounts paid/received, is at least 10% different from the present value of the cash flows under the old terms. In both cases the present value is calculated by reference to original loan’s effective interest rate.

1.44. **Financial Assets**

Financial assets are classified into three types according to the Council's business model for managing those assets and the characteristics of the cash flows of the asset:

1) **Financial Assets Measured at Amortised Cost** – assets where it is the Council's intention to hold the asset to collect the contractual cash flows and those cash flows consist solely of payments of principal and interest which arise on specified dates

Loans and receivables are initially measured at fair value and carried at their amortised cost. Annual credits to the Comprehensive Income and Expenditure Statement for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the loans that the Council has made, this means that the amount presented in the Balance Sheet is the outstanding principal receivable plus any interest accrued to 31 March and interest credited to the Comprehensive Income and Expenditure Statement is the amount receivable for the year in the loan agreement. However, the Council could make loans to organisations at less than market rates (soft loans).

When soft loans are made, a loss is recorded in the Comprehensive Income and Expenditure Statement for the present value of the interest that will be foregone over the life of the instrument, resulting in a lower amortised cost than the outstanding principal. Interest is credited at a marginally higher effective rate of interest than the rate receivable from the voluntary organisations, with the difference serving to increase the amortised cost of the loan in the Balance Sheet. Statutory provisions require that the impact of soft loans on the General Reserves is the interest receivable for the financial year – the reconciliation of amounts debited and credited to the Comprehensive Income and Expenditure Statement to the net gain required against the General Reserves is managed by a transfer to or from the Financial Instruments Adjustment Account in the Movement in Reserves Statement.

Where assets are identified as impaired because of a likelihood arising from a past event that payments due under the contract will not be made, the asset is written down and a charge made to the Comprehensive Income and Expenditure Statement. Any gains and losses that arise on the derecognition of the asset are credited/debited to the Comprehensive Income and Expenditure Statement.

Investments are represented on the balance sheet depending on their remaining life at the Balance Sheet date:

- Investments entered into for 90 days or less - debited to the cash balance as cash equivalents and represented within the cash flow statement.
- Investments entered into for more than 90, with less than 365 days until maturity – debited to current asset investments
- Investments due to expire in more than 365 days – debited to non-current asset investments

2) **Financial Assets Measured at Fair Value Through Other Comprehensive Income** – assets where it is the Council's intention to hold the asset both to sell the asset and to collect the contractual cash flows and those cash flows consist solely of payments of principal and interest which arise on specified dates, or assets which are equity instruments which it is the Council's intention to hold for more than 12 months and which the Council has irrevocably elected to present changes to their fair value in Other Comprehensive Income and Expenditure

These assets are initially measured and carried at fair value. Where the asset has determinable payments of dividends or interest, these are credited to the Comprehensive Income and Expenditure Statement. Interest receivable is based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Dividends are recognised when the Council's right to receive the payment has been established and the amount can be measured reliably.

Values are based on the following principles:

- instruments with quoted market prices – the market price
- other instruments with fixed and determinable payments – discounted cash flow analysis

Changes in fair value are balanced by an entry in the Financial Instrument Revaluation Reserve and the gain/loss is recognised in Other Comprehensive Income and Expenditure and the Movement in Reserves Statement. Impairment of these assets, due to expected credit losses, is charged to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement and credited to a loss allowance account which reduces the carrying value of the financial asset. Any gains and losses that arise on de-recognition of the asset are credited/debited to Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement, along with any accumulated gains/losses. Where fair value cannot be measured reliably, the instrument is carried at cost (less any impairment losses).

3) **Financial Assets Measured at Fair Value Through Profit or Loss** – assets which are neither measured at amortised cost nor where changes to fair value are presented in Other Comprehensive Income and Expenditure

These assets are initially measured and carried at fair value. Where the asset has determinable payments of dividends or interest, these are credited to the Comprehensive Income and Expenditure Statement. Interest receivable is based on the amortised cost of the asset multiplied by the effective rate of interest for the instrument. Dividends are recognised when the Council's right to receive the payment has been established and the amount can be measured reliably.

Values are based on the following principles:

- instruments with quoted market prices – the market price

- other instruments with fixed and determinable payments – discounted cash flow analysis

Changes in fair value are balanced by an entry in Financing and Investment Income and Expenditure in the Comprehensive Income and Expenditure Statement.

1.45. **Interests in Companies and Other Entities**

Where the Council has material interests in companies and other entities that have the nature of subsidiaries, associates and joint ventures, it is required to prepare group accounts. In the Council's own single-entity accounts, the interests in companies and other entities are recorded as investments, i.e. at cost, less any provision for losses.

AA rated corporate bonds

Financial indicator of very good quality, low risk debt securities. These are assigned by credit rating agencies such as Moody's, Standard & Poor's and Fitch Ratings to have letter designations (such as AAA, B, CC).

Account

A group of expenditure items or balances with similar qualities will be summated into an ‘account’ balance such as an individual reserve account, or revenue expenditure account.

Accounting Policies

The Councils document outlining how it will account for all of its operations.

Accounting Principles

Commonly accepted set of concepts or assumptions that have to be followed when producing financial statements.

Accounting Standard

Statutory guidelines which explain how to treat financial activities in the financial statements. See International Financial Reporting Standards (IFRS).

Accrual

The accruals concept requires that the cost or benefit of a transaction is shown in the period to which the goods or services are received or provided, rather than when the cash is paid or received.

Accruals Concept

Requires operations of the Council to be reported in the financial statements at the point which they took place, rather than when the cash was paid or received.

Accumulating Absences

Types of leave which employees are entitled to each year; which if untaken in one financial year will be added to the entitlement for the following year.

Acquired / Acquisition

Operations or assets which have become the responsibility of the Council, such as through purchase, a Government reorganisation, donation or merger.

Actuarial

The estimation technique applied when estimating the liabilities to be recognised for defined benefit pension schemes in the financial statements of an organisation.

Actuaries

An actuary is a professional who deals with the financial impact of risk and uncertainty. Actuaries provide assessments of financial systems and balances.

Amortisation

The term used to describe the charge made for the cost of using intangible fixed assets. The charge for the year will represent the amount of economic benefits consumed for example wear and tear.

Amortised Cost – Financial Instruments

The valuation of a financial asset or liability based on repayments of principal, interest accrued at a constant rate and the difference between the initial amount recognised and the maturity amount. For financial assets this is adjusted by any loss allowance.

GLOSSARY OF TERMS

Amortised Cost – Other Non-Current Assets

The cost of intangible assets reduced by the amount of amortisation charged to date.

Annual Leave

Yearly entitlement of paid time off for Council staff.

Asset Register

Listing of all property (for example land, buildings, furniture, infrastructure, software) owned by the Council. The register holds all financial information relating to the asset.

Assets

Right or other access to future economic benefits.

Assets Held For Sale

Non-Current Assets which meet the relevant criteria to be classified as held for sale.

Assets Under Construction

Assets which are in the process of being constructed and are not yet operational.

Associates

An entity (including partnerships) which is not a subsidiary or joint venture, where the Council has significant influence.

Authorised For Issue

The date which the financial statements have been certified by External Audit and signed the relevant Officers and Members of the Council.

Balance Sheet

Shows all balances including reserves, long-term debt, fixed and net current assets, together with summarised information on the fixed assets held.

Balance Sheet Date

The date at which the Council reports its financial statements. For Derbyshire County Council, this date is the 31 March.

Bias

Influence or direction.

Billing Authorities

Councils who are responsible for issuing Council Tax Invoices and collection of income from local residents. The relevant share of that income is then transferred to the Council**.**

Borrowing Requirement

The amount required to be loaned from Money Markets or other financial institutions or Councils in order to support capital expenditure.

Business Rates

Local property taxation issued to businesses, similar to Council Tax on residential properties. Also known as National Non Domestic Rates (NNDR).

Cabinet

Sub-committee of elected Councillors representing the functions and portfolios of the Council.

Capital

Assets which have a long term value (more than one year) to the Council such as Buildings.

Capital Adjustment Account

Capital reserve largely comprising of resource applied to capital financing and is not available to the Council to support new investment.

Capital Appreciation

Increase in the worth of assets over time due to changes in market conditions or enhancements to the asset.

Capital Costs

Reflects the element of annual payment for PFI or Leased assets which is in relation to the reduction in the long term debt associated with the asset.

Capital Expenditure

Expenditure on the acquisition of, or enhancement to fixed assets. This cannot be merely to maintain the value of an existing asset.

Capital Financing Requirement

The Capital Financing Requirement measures the amount of capital spending that has not yet been financed by capital receipts, capital grants or contributions from revenue income. It is a measure of the underlying need to borrow for a capital purpose.

Capital Grant

Grant which is intended to fund capital expenditure.

Capital Grants Unapplied Reserve

Balance of capital grants received which is available to finance future capital expenditure.

Capital Receipts

Income received from the sale or utilisation of property, such as sale proceeds or rental income on finance leases.

Capital Reserves

Reserve balances held for capital purposes.

Carrying Value

The amount at which an asset is recognised after deducting any accumulated depreciation and impairment losses.

Cash Flow Statement

This consolidated statement summarises the inflows and outflows of cash arising from transactions with third parties for revenue and capital purposes.

Cash Flows

Monies received or paid either as cash or bank transactions. Cash inflow denotes money received, cash outflow denotes money paid.

Chartered Institute of Public Finance And Accountancy (CIPFA)

The main authority on accountancy and financial management for the public services in the UK.

CIPFA Code

A publication produced by the Chartered Institute of Public Finance and Accountancy (CIPFA) that provides comprehensive guidance on the content of a Council's Statement of Accounts

Collection Fund

The fund maintained by authorities who have responsibility to bill Council Tax and Non-Domestic Rate payers (billing authorities).

Collection Fund Adjustment Account

Revenue reserve to represent the difference between the income received by a local authority in Council Tax and the amount attributable to them.

Collection Fund Statements

The statutory financial statements produced as part of the Statement of Accounts by authorities who have responsibility to bill Council Tax and Non-Domestic Rate payers (billing authorities).

Community Assets

Assets which are held for the benefit of the community where there is no determinable useful life.

Comparative Year

The previous year to that which is being reported.

Component Accounting

The concept that individual parts of an asset (such as land, building, roof, sheds) should be treated differently in the financial statements dependent on the expected useful life or value of those individual parts. The concept expects that some parts of an asset require repair or replacement sooner than others.

Comprehensive Income And Expenditure Statement

Financial Statement detailing the revenue operations of the Council. This represents the private sector equivalent of a Profit and Loss Statement.

Condition

A requirement which must be met for an asset or liability to be recognised by the Council. For example, a donation which can only be spent within a specific service area such as museums or to support children.

Contingent Assets And Liabilities

A possible asset or obligation that arises from past events whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Council.

Contract Asset

The Council's right to receive consideration in exchange for goods or services that it has transferred to a service recipient where that right is conditional on something other than the passage of time (such as the Council's future performance).

Contract Liability

The Council's obligation to deliver goods or services to a service recipient for which it has already received consideration.

Contributions

Income received by the council which is not a grant, donation, fine, or in direct exchange for goods or services.

Core Service Areas

The services provided by the Council externally, such as education, highway maintenance and adult social care.

Corporate And Democratic Core

Costs associated with maintaining a democratic representation and management within the Council. For example Members Allowances and administrative costs associated with supporting elected Members.

Council

The Council comprises all of the democratically elected Councillors who represent the various electoral divisions.

Council Tax

Council Tax is a local taxation that is levied on dwellings within the local Council area, and funds all Council services.

Credit

A credit represents income to a revenue account.

Credit Loss

The difference between contractual amounts due to the Council and the amounts it expects to receive.

Creditor

Represents the amount that the Council owes other parties.

Current Service Cost

The current service cost is the increase in the value of the pension schemes future pension liabilities arising from the employees on-going membership of the pension scheme.

Current Value

IFRS13 introduces the concept of current value and defines it as the measurements that reflect the economic environment prevailing for a service or function the asset is supporting at the reporting date. Current value can be fair value, existing use value, existing use value – Social Housing and depreciable replacement cost.

Current Year Entry

A transaction which has occurred in the financial year being reported.

Curtailments

Materially reducing the expected years of future services of current employees or eliminating for a significant number of employees the accrual of defined benefits for some or all of their future services.

Debit

A debit represents expenditure against a revenue account.

Debt Outstanding

The remaining principal balance owed on a loans or investments.

Debtors

Represents the amounts owed to the Council.

Equity Instrument

A contract which evidences a residual interest in the assets of another entity after deducting all of its liabilities. Examples include shares and derivatives that give the Council the right to receive a fixed number of shares for a fixed amount of cash (or another financial asset) in an exchange which is expected to be favourable to the Council.

Defined Benefit Scheme

Also known as a Final Salary Scheme. Pension scheme arrangement where the benefits payable to the members are determined by the scheme rules. In most cases there is a compulsory members' contribution but over and above this all costs of meeting the quoted benefits are the responsibility of the employer.

Defined Contribution Scheme

Also known as a Money Purchase Scheme. Pension scheme arrangement where the employer's liability is restricted to the amount that they contribute. Benefits payable to the members depend on the performance of the invested contributions of the members and the employer, the level of contributions invested, the charges deducted by the product provider and the annuity rate at retirement.

De-Minimis

Minimum level required. For example expenditure below the capital de-minimis is below the minimum level required to be treated as a capital expenditure item.

Department For Education

Central Government Department, responsible for education and children's services in England.

Depreciable Replacement Cost (DRC)

DRC is a method of valuation that provides the current cost of replacing an asset with its Modern Equivalent Asset less deductions for all physical deterioration and all relevant forms of obsolescence and optimisation.

Depreciation

The term used to describe the charge made for the cost of using tangible fixed assets. The charge for the year will represent the amount of economic benefits consumed by, for example, wear and tear.

Derecognition

The process whereby a component is replaced to avoid double counting when no future economic benefits or service potential are expected from its use or upon disposal.

Discount

An allowance received through the early repayment of debt.

Discounted

Reflecting the equivalent value today of a payment or income made or due in the past or future.

Discounted Cash Flow

A method of analysing future cash flows, by removing the impact time has on the value of money, and producing an equivalent current value (present value).

Discretionary Benefits

Benefits given to employees which are not statutorily obliged.

Disposal

Operations or assets which have left the responsibility of the Council, such as through sale, a Government reorganisation, donation or merger.

Donated Assets

Assets which have been acquired at below market cost.

Dowry

One off payment made as donation, contribution or pre-payment of an obligation.

Earmarked Reserves

Reserve balances which have been set aside for future spending in a specific area.

Economic Life

The number of years the Council is expected to receive economic benefits to deliver services.

Effective Rate

The interest rate embedded within a contract or lease, allowing for regular annual payments and the time value of money.

Employee

A person who holds an office within the Council, but does not include a person who is an elected Councillor.

Employee Benefits

Monetary or other awards to employees of the Council in exchange for services provided. For example, pay, holidays, and pensions.

Employee Costs

The costs directly associated with employees, including but not exhaustively salaries and wages, National Insurance contributions and pension’s costs.

Employer Contributions

The payments made to an employee’s pension scheme by the Council.

Enhancement Expenditure

Expenditure which increases the value of an asset.

Entity

Something with a legal status such as the Council, a company, or an individual.

Events After The Balance Sheet Date

An event which occurs between 31 March and the date that the accounts are signed which would alter the conclusion reached by any reader of the accounts.

Exceptional Items

Material items that result from the ordinary activities of the Council, but to a value so significantly abnormal that is not expected to recur at that level.

Existing Use Value (EUV)

The value of an asset based on what it is currently being used for. For example, two identical buildings in construction and design may have different values where one is used as a school and another is used as offices.

Exit Packages

The payment made to an employee upon leaving the Council.

Expenditure

Payments made of goods or services.

Fair Value

The income that would be received on sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Fair Value Through Other Comprehensive Income (FVOCI)

Measurement of a financial asset at fair value where any gain or loss on revaluation is recognised in other comprehensive income and expenditure and taken to the Financial Instrument Revaluation Reserve.

Fair Value Through Profit or Loss

Measurement of a financial asset at fair value where any gain or loss on revaluation is recognised as a credit or charge to Surplus or Deficit on Provision of Services within the CIES.

Finance Income

Interest receipts.

Finance Lease

A lease that transfers substantially all of the risks and rewards of ownership of a fixed asset to the lessee.

Financial Assets

A type of financial instrument which gives the Council the right to receive future economic benefits.

Financial Instruments

An umbrella term to describe all financial services and trading with which the Council may operate, including loans, borrowings, bank accounts and debtors.

Financial Instruments Adjustment Account

Revenue reserve which records the timing differences between the rate at which gains and losses are recognised and the rate at which debits and credits are required to be made against Council tax.

Financial Instruments Revaluation Reserve

This reserve contains the cumulative gains and losses relating to the valuation of financial assets held at fair value through other comprehensive income. When the underlying financial assets are de-recognised any gains or losses held in this reserve are credited or expensed to the Surplus or Deficit on Provision of Services.

Financial Liabilities

A type of financial instrument that confers an obligation on the Council to transfer economic benefits under its control.

Financial Statements

Published document, consisting of the Balance Sheet, Comprehensive Income and Expenditure Statement, Movement in Reserves Statement, Cash Flow Statement and Notes to the Accounts.

Financial Year

The current year being reported upon running from 1 April to 31 March.

Five Year Financial Plan

The Councils Medium Term Financial Plan, setting out the financial projection for the Council over the coming 5 years.

Fixed Assets

See Non-Current Assets.

Flexi-Time

Time owed to employees who have worked above the contracted hours.

Gain

Where income exceeds expenditure.

General Provisions

Money set aside in the Balance Sheet where its future use is not known.

General Reserve

The reserve held by the County Council for general purposes, i.e. against which there are no specific commitments.

General Revenue Government Grants

Grant income received from Central Government (or Government Department) which is not restricted in its use.

Going Concern

The going concern accounting concept assumes that the organisation will not significantly curtail the scale of its operation in the foreseeable future.

Goods Or Services

Supplies required by the Council to perform its operations. Examples of goods; paper, bricks or light bulbs, and services; electricity, petrol or agency staff.

Grants

Payment towards the cost of local authority services. These are either for particular purposes or services (specific grants) or in aid of local services generally (formula grant).

Group Accounts

Where a Council has a controlling interest in another organisation, group accounts have to be produced. These accounts report the financial position of all of the group entities.

Hire Purchase

A contract for the provision of an asset which becomes the property of the lessee at the end of the contract period.

Historic Cost

The cash paid in obtaining an asset in its current form. Inclusive of purchase price and enhancement expenditure.

HM Revenue & Customs

Her Majesty's Revenue and Customs is a non-ministerial department of the UK Government responsible for the collection of taxes, the payment of some forms of state support, and the administration of other regulatory regimes including the national minimum wage.

HM Treasury

Her Majesty's Treasury, sometimes referred to as the Exchequer, or more informally the Treasury, is the United Kingdom government department responsible for developing and executing the British government's public finance policy and economic policy.

IFRIC

International Financial Reporting Interpretation Committee.

Immateriality

Immateriality is an expression of the relative insignificance or unimportance of a particular matter in the context of the financial statements as a whole.

Impairment

Impairment is the amount by which the carrying amount of an asset exceeds its recoverable amount.

Inception

The point in time which something began such as a project, contract or lease.

Income

Cash flows into the Council.

Income From Service Recipients

Consideration a party, that has contracted with the Council, has given in exchange for goods or services that are the output of the Council's normal operating activites. Such a contract may be in writing, orally or in accordance with customary business practices.

Income In Advance

Income received before the point at which an obligation to receive it has occurred.

Infrastructure

A network and grouping of inalienable components, expenditure on which is only recoverable by continued use of the asset created i.e. there is no prospect of sale or alternative use. The inalienable components include carriageways, footways, cycle tracks, structures, street furniture, street lighting, traffic management systems and land.

Intangible Asset

Non-current assets which do not have physical form such as software.

Interest Accrued

Accrued interest is the interest on a bond or loan that has accumulated since the principal investment or since the previous coupon payment if there has been one already.

Interest Payable

The amount of interest due for payment within a financial year.

Interest Rate

The rate at which interest is calculated on a loan or investment.

Interest Receivable

The amount of interest due for receipt within a financial year.

International Accounting Standards (IAS)

Regulations outlining the method of accounting for activities, IAS's are currently being replaced with International Financial Reporting Standards (IFRS's) issued by the International Accounting Standards Board.

International Financial Reporting Standards (IFRS)

Regulations outlining the method of accounting for activities, issued by the International Accounting Standards Board.

International Public Sector Accounting Standards (IPSAS)

Public Sector regulations outlining the method of accounting for activities.

Inventories

Goods purchased in advance of their use which are held in store.

Investment Property

Assets held solely for the purposes of rental generation or for increasing the value pre-sale (capital appreciation) or both.

Joint Venture

An organisation which the Council has partial control and ownership, but decisions require the consent of all participants.

Lease

Financial contract for the continuing use of an asset.

Lease Interest

The interest rate inherent within a lease allowing for regular rental payments and an adjustment for the time value of money.

Lease Payments

Regular payment made in exchange for the use of an asset.

Leases

A method of funding expenditure by payment over a defined period of time.

Lessee

The person or organisation that is using or occupying an asset under lease (tenant).

Lessor

The person or organisation that owns an asset under lease (landlord).

Liabilities

An obligation to transfer economic benefits. Current liabilities are payable within one year.

Loans And Receivables

Financial assets which are not quoted in an active market and have either a fixed or determinable payment.

Loan Modification

A change to the terms of an existing loan. Changes may include a reduction in the interest rate, an extension of the loan term, or a reduction in the principal balance.

Loan Modification Gain/Loss

An amount arising from adjusting the carrying value of a loan to reflect the cash flows under the renegotiated terms of the loan, but accruing interest at the rate specified in the original loan terms.

Long Term Debtor

Income due in more than 365 days of the balance sheet date.

Long Term Liability

Payment due in more than 365 days of the balance sheet date.

Loss

Where expenditure exceeds income.

Loss Allowance

A reduction to the value of financial assets for the expected credit losses relating to those assets.

Materiality / Material

Materiality is an expression of the relative significance or importance of a particular matter in the context of the financial statements as a whole.

Maternity Leave

Statutory time off due to pregnant women and new mothers.

Members

Elected Councillors responsible for the democratic leadership of the Council.

Members Allowances

Allowances paid to members in association with their roles and responsibilities.

Minimum Lease Payments

The minimum which will be paid or received over the life of a lease agreement.

Minimum Revenue Provision (MRP)

A prudent amount of revenue set aside to contribute towards capital expenditure which has been financed by borrowing or credit arrangements.

Misstatement

An error whereby something was included in the accounts wrongly.

Modern Equivalent Asset (MEA)

The MEA should give the same service and performance as the existing asset, but should use modern materials and technology.

Movement In Reserves Statement (MiRS)

The statement detailing the movement in the reserves of the Council.

Net Cost Of Services

The direct cost of delivering the Councils services after allowing for specific income received by those services.

Net Operating Expenditure

The cost of operational items which are not direct services, such as disposing of the Councils assets, after allowing for specific income received.

Net Realisable Value

The estimated selling price of an asset in the ordinary course of operations less any completion costs and costs to make the sale, exchange or distribution.

Non Distributed Costs

The value of revenue operating expenditure that is not able to be apportioned to one of the authorities core service areas.

Non-Accumulating Absences

Types of leave an employee may take in a financial year, which if are not taken do not get added to the following year’s entitlement. For example Sick Leave.

Non-Current Assets

Assets that yield benefits to the Council for a period of more than one year, examples include land, buildings and vehicles.

Non-Vesting

An obligation which cannot be settled by a monetary payment.

Notes To The Accounts

A set of supplementary comments, tables and information which further explains the main Financial Statements.

Obligation

The requirement to transfer economic benefits.

Operating Lease

A lease where an asset is used only for a small proportion of its economic life.

Operational

The normal activities of the Council.

Past Service Cost

Past service cost is the change in the present value of defined benefit obligations caused by employee service in prior periods.

Payment In Advance

A payment made which is before the point of any obligation.

Pension Liabilities

The cost, calculated by an Actuary, of providing the current members of a pension scheme with retirement benefits as set out in the pension scheme rules.

Pensions Costs

The benefits paid by the Council which are accrued during the period of employment and paid to ex-employees after retirement.

PFI

See Private Finance Initiative.

PFI Credits

The financial support provided to Local Authorities to part fund PFI capital projects.

Pooled Investment Funds Adjustment Account

This reserve contains the cumulative gains and losses related to pooled investment funds measured at FVPL as required by the statutory override effective for financial years 2018-19 to 2022-23.

Premium

A payment made in association with the early repayment of debt.

Pre-Payments

See payment in advance.

Present Value

See Discounted.

Previous Year Adjustments

These are material adjustments relating to prior year accounts that are reported in subsequent years and arise from changes in accounting policies or from the correction of fundamental errors.

Principal

The amount of repayment to a lender which relates to the reduction in the loan, rather than the interest paid on the loan.

Private Finance Initiative (PFI)

A Government initiative that enables, through the provision of financial support, Authorities to carry out capital projects through partnership with the private sector.

Projected Unit Method

This is a common actuarial funding method to value pension scheme liabilities.

Property, Plant And Equipment Assets (PPE)

Assets with a long Term value and physical substance such as buildings, land, IT equipment or vehicles.

Provisions

Potential costs that the Council may incur in the future because of something that happened in the past, which are likely or certain to be incurred and a reliable estimate can be made to the costs.

Prudent

A cautious approach to present the Financial Statements without significant risk of failure to achieve the assets presented.

Quoted Market Prices

A method of determining the fair value of financial assets via prices quoted on an active market.

Recognition

The process upon which assets are deemed to belong to the Council ether by purchase, construction or other form of acquisition.

Receivable

The Council's unconditional right to receive consideration in exchange for goods or services that it has transferred to a service recipient.

Residual

The remaining value in an asset at the end of a contract or lease.

Retirement Benefits

Remuneration package received by employees after their retirement from the Council.

Retrospectively

Changes made to previous years accounts to alter the treatment which has previously been reported.

Revaluation Gain

The increase to the fair value of an asset following a valuation.

Revaluation Reserve

This reserve contains revaluation gains on assets recognised since 1 April 2007 only, the date of its formal implementation.

Revenue

The cost associated with providing Council services.

Revenue Expenditure

Expenditure which is not capital.

Revenue Expenditure Funded From Capital Under Statute (REFCUS)
This is expenditure that is classified as capital although it does not result in the creation of a fixed asset.

Revenue Grant
Grant which is not capital.

Risk
The chance of an asset not coming to fruition or a liability being greater than anticipated.

Royal Institute Or Chartered Surveyors (RICS)
An international organisation who represent everything professional and ethical in land, property and construction.

Salaries And Wages
Payments made to employees in exchange for service worked at the Council.

Service Concession Arrangements
Arrangements which involve the supply and maintenance of assets and service delivery.

Service Costs
Reflects the element of annual payment for PFI or Leased assets which is in relation to services provided within the contract.

Service Expenditure Reporting Code of Practice (SERCOP)
CIPFA guidelines on reporting revenue expenditure.

Service Level Agreements
Contract of service.

Short Term
Less than 365 days from the balance sheet date.

Short Term Benefits
Employee benefits earned and consumed during employment.

Significant
A measure of materiality where the value is deemed to be almost all of the total value in question.

Soft Loans
Low interest rate loans.

Spot Yields
A calculation of the projected return on bonds if held to maturity.

Staff
See employee.

Statute
Set out in legislation.

Straight Line Basis
The method of calculation of depreciation to allocate an equal amount of depreciation each year over an asset’s useful life.

Support Services
Indirect costs of providing Council services including HR, Finance, Legal and Property Maintenance.

Surplus
Arises when income exceeds expenditure or when expenditure is less than available budget.
Surplus Assets
Assets which are no longer in operation.
Tangible
Physical, can be touched.
Tenant
The person or organisation that is occupying an asset under lease.
Termination Benefits
Employee benefits paid upon termination of employment such as redundancy.
The Code
CIPFA guidelines on accounting within Local Government.
Transactions
Individual items of income or expenditure.
Treasury Management
Utilisation of cash flows through investments and loans.
Unidentified Income
Income received by the Council where the reason for the income is unknown.
Unusable
Balances which are not available to support future spending.
Usable
Balances which are available to support future spending.
Useful Life
The period with which an asset is expected to be useful to the Council in its current state.
Value Added Tax
National taxation charged on goods and services.
Vesting
Obligation due which can be paid in cash.
Work In Progress
The fair value of incomplete contracts for goods and services which are to be charged to external customers.
